Approximately half of the world's population lives in coastal regions. Particularly for these people the sea plays a crucial role as a natural resource, as an abundant source of food, as a living and recreational area as well as a dumping ground for waste. The coming decades will witness especially in the tropics an increase in the number of people living in coastal regions: two-thirds of the world's population is expected to live there. If the current trends in the use of coastal zones continue, most will live in polluted, ecologically degraded mega-cities of more than 10 million inhabitants, all lacking in infrastructure.

The tropics provide classic examples: Mangrove forests are being cleared to make room for fast growing cities, for the expansion of road networks, for wood, or to provide a short-term source of income through aquaculture facilities. Coral reef ecosystems are under threat from destructive fishing practices, uncontrolled tourism and from bleaching that is observed in many regions. Since both coral reef and mangrove ecosystems shelter fish populations at various life stages, their degradation has an immediate impact on coastal fisheries. Land-based human activities compound the problems. Environmentally harmful chemicals from industries, nutrients and pesticides from agricultural activities and sediments from enhanced soil erosion are washed into the estuaries of rivers and coastal seas. As a consequence, pollution, eutrophication, as well as frequent occurrences of anoxic conditions and harmful algal blooms are major problems in many coastal areas. They affect the overall health of coastal ecosystems and their socio-economic and regulatory functions. Examples are their diminishing ability to provide food and their diminishing potential to act as sinks for climatically relevant trace gases.

In the coming decades the pressure on coastal ecosystems will further increase as a consequence of global climate change. The resulting feedbacks as well as pressure from increasing populations are likely to exacerbate these impacts affecting not just the tropics: They will have global consequences.

Local populations whose existence is most affected are amongst the least prepared for a solution to combat these problems. Integrated concepts for wise use of resources from coastal ecosystems are needed. In most

countries the necessary instruments are presently unavailable: lack of institutions, infrastructure, long-term projects and human capacity. This deficit also affects the necessary legislation, implementation and enforcement.

Today, »Integrated Coastal Zone Management« is being increasingly cited in conjunction with ecosystem research in coastal regions impaired by human uses. Its global scale and importance are underlined by its recognition and treatment in international conventions and treaties (e.g. UNCED, UNCBD). However, among countries that

are parties to these conventions, many still lack the human and infrastructure resources to effectively comply with the resulting obligations. Several international agencies under the United Nations Organization (e.g. UNESCO-IOC, UNEP) as well as initiatives by industrialized nations through bilateral cooperative projects have been under way to remedy the situation.

The »Center for Tropical Marine Ecology« (Zentrum für Marine Tropenökologie – ZMT) was established in 1991 at the University of Bremen with basic funding from the State of Bremen and from project support from the Federal German Ministry for Education and Research. The ZMT's activities are tailored to meet the needs of tropical and subtropical countries in capacity and infrastructure building in the field of marine sciences. They focus on scientific issues related to the sustainable use and management of tropical and subtropical coastal ecosystems and their resources. The creation of global partnerships and international networks in research

and teaching hereby play a central role. The activities thus contribute to implementing the recommendations as outlined in the Agenda 21 and the United Nations World Summit on Sustainable Development (WSSD).

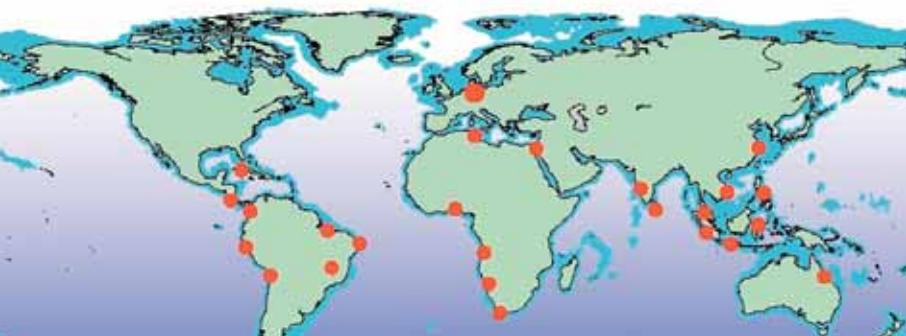

The ZMT is a member of the MARUM-association of marine research institutions and completes the broad spectrum of Bremen's marine science institutions with their re-

geographically. The existing expertise in the area of aquatic tropical ecology and biogeochemistry and of modeling as well as the accumulated experience in dealing with social and economic issues in coastal zone management are now being incorporated into projects in new tropical marine regions. Thus the center has been active through long-term bilateral research projects funded by the BMBF and the Deutsche Forschungsgemeinschaft (DFG) in Brazil, Cuba, Indonesia, Jordan and Vietnam. Furthermore, the good working relations with China, Ghana, India and Peru are being maintained within the framework of both smaller bilateral projects and projects within international programs. The cooperation with countries in the southern Africa region continues within the BENEFIT-Program.

The ZMT also entered into new co-operation agreements with a number of universities and research institutions in Cuba, Indonesia, the Philippines and Thailand. A Memorandum of Understanding (MoU) was signed with the International Ocean Institute (IOI) with the aim of establishing an IOI operational center for Germany in 2003.

The ZMT has been able to intensify its collaboration with the University of Bremen and within the Center for Marine Environmental Sciences (MARUM). This entails on the one hand, the management, quality control and need-orientated development of the ISATEC Study Program, with the increased involvement from University faculties. On the other hand, the ZMT contributed to conventional teaching offered by the various faculties of the University of Bremen in the fields of marine biology, biogeochemistry, as well as social sciences. New international study courses as well as certificate courses in marine tropical ecology were developed and promoted in cooperation with both national and international partners.

The ZMT's role as a national contact point and a central coordination unit for marine tropical research was strengthened through its »Contact Office for Tropical Coastal Research« (Contact Office Tropicoast). The Contact Office promotes communication and cooperation between scientists and research institutions both at national and international level with increasing involvement and inclusion of new partners from industry and commerce.

ZMT-Partners in the World

search and educational activities covering polar to tropical regions. With its own specific competences and in cooperation with other research institutions, at both the national as well as the international level, the ZMT contributes to advancing our understanding of earth system processes, their perturbation by human activities as well as to providing the necessary science base for the formulation of management plans for the sustainable use of coastal marine resources.

In April 2000, Professor V. Ittekkot succeeded Professor G. Hempel as the director of the institute. The ZMT has since then consolidated its existing research competence in coastal zone management and broadened the scope of its activities both thematically and

Mangrove Dynamics and Management – MADAM

The Mangrove Dynamics and Management program (MADAM) is a bilateral German-Brazilian project supported by the BMBF and the State of Bremen, and by the Brazilian research council CNPq. The project was initiated in 1995 under a special agreement between the State of Bremen and the Federal Ministry for Education and Research which foresaw support for the development of the ZMT into a national center for tropical marine ecology while effecting a stepwise transfer of the funding responsibility from the BMBF to the State of Bremen over a period of ten years.

Within the project, the ZMT and its partners from the University of Bremen and from the Brazilian Universidade Federal do Pará (UFPa) – located in Belém and Bragança – conduct research in the Caeté river estuary and its adjoining mangrove-covered peninsula to provide the scientific basis for its conservation and sustainable cultivation of the mangrove forests. Approximately 70% of the households in this area rely for their livelihood directly or indirectly on the natural products derived locally from the region. Mangrove trees provide the firewood for the operation of brickworks and baker-

conservational research projects and possible improvement of synergy effects. In spring 2001, the Brazilian and German project participants met at a 3-day planning workshop in Brazil. The cooperation agreement between the ZMT and UFPa was extended for another five years in July 2001. This was followed by the first joint German-Brazilian review of MADAM in Belém and Bragança in September. While approving the project work until 2005, the Joint Steering Committee recommended that periods of the German and Brazilian funding for the project be synchronized.

The cooperation between MADAM and an ongoing project within the framework of technical cooperation, PROPENDA (Programa de Renda Familiar), was intensified during the same period, and joint demonstration projects (PDIA-Programas Demonstrativas, tipo A) funded by the World Bank were initiated. This included a comprehensive survey of fish and crab catch in the research area as a basis for sustainable resource management, improvement of local fisheries product processing as well as trials on oyster farming as an alternative job creating measure for the rural population. The required

BRAZIL

ies; the narrow channels and the coastal zone are intensely fished for sale and for personal consumption. Economically, the most important product in the region is the mangrove based terrestrial crab *Ucides cordatus*, the commercial exploitation of which gives good financial returns, but whose survival is currently threatened by uncontrolled exploitation. This interdisciplinary project builds on broad biogeochemical, ecological and socio-economic studies, develops ecological models and works out recommendations that will facilitate sustainable use of the system.

Results and experience from the MADAM project were presented at a German-Brazilian Conference in August 2000 in Hamburg that discussed the overall status of bilateral

scientific database on natural and anthropogenic processes involved was developed and can now be used in models describing the behavior of the system under specific scenarios. These new datasets, combined with those available in the mangrove information system, MAIS, provide the basis for the development of a »Decision Support System« contributing to the formulation of management recommendations.

These results provided the basis for defining the working foci for the third project phase that will devote itself to the synthesis of the results: (1) a synoptic analysis of the surface structure on a local and regional level, and (2) the management of natural resources and their relationship with natural,

economic and social systems, taking special account of the mangrove crab *Ucides cordatus*, the key exploited local species. These foci are to be supplemented by public awareness work and database management. The proposal for the project extension to the third phase was submitted in December 2001 and approved by the BMBF in August 2002.

Numerous German examination candidates and Master's students of the ISATEC course of study, as well as Brazilian undergraduate students, are involved in the MADAM project. Two Brazilian junior scientists are writing their doctorate theses on a MADAM topic at the University of Bremen.

Further Projects

BRAZIL

In August 2001, upon invitation and with the funding of the Departamento de Oceanografia, the ZMT participated in an investigation that will shed light on the exchange rate of water and plankton between the estuarine and coastal waters in the Canal de Santa Cruz. The samples and data collected are currently being analyzed in Recife and at the ZMT. Both canal exits were sampled four times at full moon and at half moon with CTD, ADCP (Acoustic Doppler Current Profiler) and various plankton nets over a 24 hour time period. Fourteen scientists and technicians participated in the sampling phase.

A joint research project with the Departamento de Oceanografia in Recife was applied for in 1999 at the Project Office of the BMBF in Warnemünde and a smaller exchange program at the BMBF's IB. The cooperative project for the examination of fish communities in a mangrove system was approved on the German side. These and other projects related to the management of coastal ecosystems and their resources are being taken up within the framework of new initiatives that are currently under way in marine science and technology cooperation between Brazil and Germany.

Red Sea Program on Marine Science – RSP

The »Red Sea Program on Marine Sciences – RSP«, initiated in 1995 with the financial support from the BMBF, was completed in 2002. The project was coordinated by the ZMT. The central topic of the project was the ecology of the coral lined Gulf of Aqaba. Within the project, a multidisciplinary team of marine scientists from German research institutions and universities worked together with a team of scientists from research organizations and institutions in Egypt, Jordan, Israel and Palestine.

ZMT scientists involved in reef research in the RSP, continued to work on the observation of organisms and water currents underwater and developed an automatic control of a video-system for day and night observations. In 2001, the results from the deployment of such a system (»CaveCam«, an endoscopic camera system for the exploration of small caves, recesses and niches in the coral reefs) were published in »Nature«.

process was coordinated and handled by the ZMT.

The plans for a final symposium had to be abandoned due to the continuing political crisis in the Middle East. However, the contacts established were kept alive within the bilateral programs with countries in the region. One such program (»Red Sea Ornamentals - Clean Aquaculture Project«) was initiated in cooperation with the Marine Science Station (MSS) at Aqaba in 2002 with the support of the BMBF. The project aims to develop environmentally friendly aquaculture and to produce reef organisms for the aquarium market. Today, the species that are favored by aquarists and aquarium owners mostly come from wild catches, which is detrimental for the coral reefs. The newly developing technology aims to produce marine ornamental organisms in closed artificial ecosystems and to obtain a high yield through the tight coupling of the nutrient cycles and use

MIDDLE EAST

The final phase of the program also saw the completion of doctoral theses by Jordanian students at the participating German institutions as well as the publication of the results within a theme section on »The Red Sea Programme« in the journal »Marine Ecology Progress Series«. The entire publication

of solar energy, without polluting the environment. The project was conceived during discussions with the University of Jordan, the Yarmouk University and the MSS in Aqaba in August 2001. Apart from the ZMT and the MSS, the Institute for Marine Research (IfM) in Kiel and the company Sander Enterprise

from Lower Saxony are involved in this German-Jordanian project.

Ongoing project work includes the breeding of the giant clam and the polyculture of reef organisms in a recirculation facility. First trials of the reproduction of the clams were successful. The planning for the construc-

tion of the recirculation facility has been progressing well and the foundation stone for the new laboratory was laid at the end of October 2002; the construction work is expected to start after the conclusion of the approval procedure in 2003.

Further Red Sea Research Projects

MIDDLE EAST

The cooperation with the RSP activities between the ZMT and the Alfred-Wegener-Institute for Polar and Marine Research on the subject of plankton research is being actively continued by a doctorate on the importance of zooplankton for the pelagic-benthic coupling in coral reefs in the Red Sea. The project, which is based at the MSS in Aqaba, receives inputs from research assistants from the Inter-University Institute in Elat, as well as from Israeli planktologists within the frame of the Israeli-Palestinian »Peace Park Project«. The contacts with the National Institute of Oceanography and Fisheries

(NIOF) in Egypt have been revived. These measures contribute to the development and expansion of present research capacity in the region as well as to the strengthening of training and updating of technical equipment. Furthermore, they are expected to promote interdisciplinary collaborations allowing for a better understanding of the region's unique marine ecosystems via, for example, the development and use of new technologies. The German contribution to these activities was emphasized at an event organized in Aqaba in October 2002 in honor of the coordinator of the RSP, Prof. G. Hempel.

German-Indonesian Cooperation within Marine Sciences and Geosciences

In 2000, the ZMT was nominated by the BMBF through the German-Indonesian Steering Committee on Marine Sciences and Geosciences to coordinate the development of an action plan for long-term bilateral cooperation between Germany and Indonesia in the field of marine sciences and geosciences. Its partners in Indonesia were the representatives from the Indonesian Ministry for Research and Technology and the Ministry for Marine Affairs and Fisheries.

Indonesia consists of 17,500 islands with a total coastline of over 80,000 km and a broad spectrum of different marine ecosystems such as sand dunes and beaches bordering estuaries, mud flats, mangrove forests, sea grass meadows and coral reefs. They constitute the transition to the open sea, where continental slopes, deep-sea abyssal plains and trenches characterize further ecosystems. The bilateral projects were to focus on coastal ecosystems and their resources with emphasis placed on developing the necessary scientific database for their sustainable management as well as on the development of the necessary human resources and infrastructure.

During the development of the action plan, scientists and representatives from German and Indonesian research institutions visited each other's institutions to acquaint themselves with the available infrastructure and human resources as well as to discuss ideas and themes for cooperation. A major event was the bilateral workshop held in association with a DAAD (German Academic Exchange Service) alumni seminar in Indonesia in March 2001. More than 100 scientists attended the event held at the University of Soedirman in Purwokerto, Indonesia. During the workshop and subsequent rounds of discussion in Bremen, Bonn and Jakarta, it was agreed to develop five project clusters under the focal theme »Sustainable management of coastal marine ecosystems«: (1) Coral

reef-based ecosystems and resources (South Sulawesi), (2) Towards developing measures for a sustainable use of the living resources of the Segara Anakan Lagoon (South Central Java), a tropical coastal ecosystem affected by environmental changes, (3) Coastal ecosystem health in Indonesia (Siak River, Riau Province, Sumatra), (4) Marine natural products and (5) Marine geology and biogeochemistry.

The proposals were submitted to the BMBF at the end of August 2002 under the overall title »Science for the Protection of Indonesian Coastal Marine Ecosystems (SPICE)«. They were approved by the German-Indonesian Steering Committee for Marine Sciences and Geosciences in October 2002 and the implementation began in 2003 under the overall coordination of the ZMT.

In addition to the development and coordination of the SPICE Program, the ZMT conducted three bilateral research projects in the field of marine ecology and biogeochemistry between 2000 and 2003, involving extensive field work on board Indonesian research vessels.

INDONESIA

Joint Indonesian German Sunda Expedition – PreJIGSE

The »PreJIGSE« expedition was carried out during 17.10. – 11.11.2000 on board the Indonesian research vessel RV »Baruna Jaya«. The major focus of the expedition was to collect ecological and biogeochemical data

from the Sunda shelf area. Fisheries biologists and biogeochemists from the ZMT and other German and Indonesian research institutions participated in this expedition under the overall coordination of the ZMT.

INDONESIA

Brantas – Madura Strait Biogeochemistry – BRAMS-I

INDONESIA

The ZMT coordinated the project »Brantas – Madura Strait Biogeochemistry (BRAMS-I)«, the goal of which is the biogeochemical characterization of the coastal waters off Java, which are influenced by the varying inputs from the Brantas River. The project is supported jointly by the BMBF and the Agency for the Assessment and Application of Technology (BPPT) in Indonesia.

The Brantas River flows over a stretch of 320 km and, near the city of Surabaya in East Java, divides into two main tributaries, the Wonokromo and the Porong, which drain into the Madura Strait. The climate in the river basin is determined by the monsoon and comprises mainly a dry period from May until October and a rainy period from November until April. Some 80% of the annual rainfall, and as a consequence, the peak river discharge, is between November and April. The river drains some of the most densely populated countryside and towns of Java: Malang, Blitar, Tulung Agung, Kediri, Jombang, Nganjuk, Mojokerto and Surabaya. In 1990, the number of people living in the catchment area of the Brantas River was estimated at approximately 13.7 million. Based on an aver-

use and (3) development of water supply systems to include private households and industrial users. These development measures resulted in drastic changes in the volume and the composition of flows into the estuary and the coastal waters. They affect the biodiversity and the biogeochemical processes in the adjacent coastal waters and will have an impact on their economic potential.

The field work within the project consisted of sampling the Brantas river, its artificial lakes, estuaries and the adjacent coastal waters of the Madura Strait and is coordinated in close cooperation with the Agency for the Assessment and Application of Technology (BPPT) in Jakarta and the Bundesamt für Seeschifffahrt und Hydrographie (BSH, Hamburg) and GKSS Research Center (Geesthacht) in Germany. The field campaigns took place between May 2001 and November 2002. Sample processing and analyses were conducted at the ZMT in Bremen and in the laboratories in Indonesia, and the data were exchanged with the Indonesian project partner. All available information on the biogeochemistry of the river, its artificial lakes and estuaries as well as on the Madura

age population growth of 2%, the current population must be over 16 million with an average population density of around 650 residents per km².

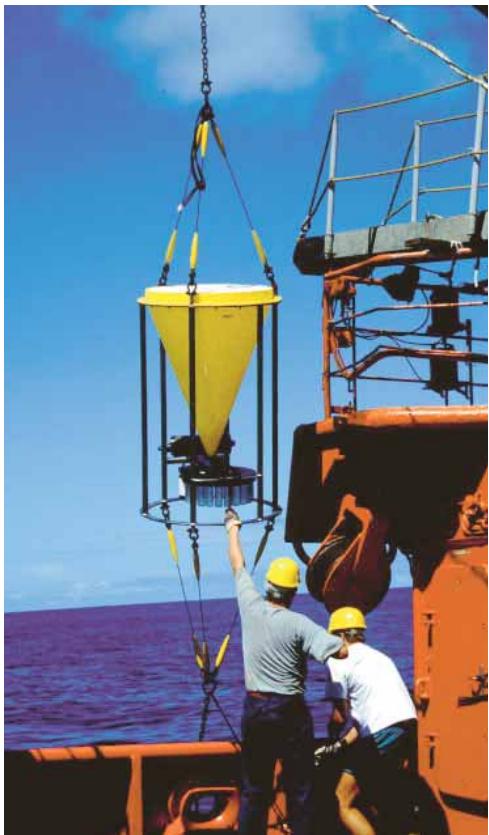

Over the last four decades, the river basin has undergone various stages of development that have had an impact on the river's ecology and biogeochemistry: (1) construction of dams to control flood waters, (2) creation of a system of irrigation for agricultural

Strait has now been compiled, and new data has been generated on the distribution of biogeochemical parameters in the river as well as on their seasonal variability over at least one hydrological year. Building on the results of the first project phase that ended in 2003, plans for submission of a new proposal for the second project phase were worked out with the Indonesian partner.

Biogeochemical Fluxes in the Indonesian Seas – I

The project »Biogeochemical Fluxes in the Indonesian Seas« investigates regions in the Indian Ocean that are characterized by

monsoon-related physical and biogeochemical features: upwelling areas south of Java, the western Arabian Sea, the equatorial Indian Ocean and the southern Bay of Bengal. The objectives are to establish the link between atmospheric and oceanographic phenomena off Indonesia with those of the western Indian Ocean. Several processes play a role in this. The water masses of the Indo-Pacific current are transported via the South Equatorial Current and the Somali Current into the Arabian Sea, where variations of the particle flux rates are influenced by the intensity of the Somali current. The Dipol-Mode couples the ocean area west of Indonesia with the western Indian Ocean, and although no clear signals for the »El Niño«-Southern Oscillation (ENSO) could be identified in the northern Indian Ocean, »El Niño« has been cited in connection with the delayed onset of the monsoon and decreasing monsoon rainfalls over India. The project is funded by the BMBF.

INDONESIA

Upwelling Region off South Java

The project off South Java measures the flux of particles from the sea surface to the deep sea with the aid of time-series sediment traps. Special attention is paid to the influence of climatic and oceanographic processes as well as to the nutrient dynamics linked with them on particle fluxes to the deep sea. On the German side, the project will be carried out in close cooperation with the University of Hamburg. The Indonesian partner in this case is the Agency for the Assessment and Application of Technology (BPPT) in Jakarta. In addition to this, there will also be participation on the part of Indonesian institutions like the ITS (Institute of Technology, Surabaya), the IPB (Bogor Agricultural University) as well as the LIPI (Indonesian Institute of Sciences).

The Indonesian Seas are influenced by the Asian monsoon system, the ENSO and by the, though restricted to the Indian Ocean, ENSO-like Ocean-Atmospheres-System

(Dipol-Mode). The aim of the project is to investigate their effects on biogeochemical processes in the region. By building on results of investigations in the Arabian Sea, the equatorial Indian Ocean and the southern Bay of Bengal, the project investigates whether there is any possible extension of the ENSO and Dipol signals observed off the coast of Java into the Indian Ocean.

During an expedition on board the Indonesian research vessel RV »Baruna Jaya IV« in October/November 2000, two time series sediment trap systems, JAM-I (Java-Mooring) and CIM-I (Cilacap-Mooring), were deployed off south-western Java. They were recovered and redeployed during cruises with RV »Baruna Jaya VII« and RV »Baruna Jaya IV« in December 2001 and in November 2002, respectively. The results allow the assessment of the factors that drive the pattern of biogeochemical fluxes within the upwelling systems.

INDONESIA

Upwelling Areas in the Northern Indian Ocean

INDIA

The ZMT cooperated with the Institute of Biogeochemistry and Marine Chemistry of the University of Hamburg (IfBM) and the National Institute of Oceanography (NIO) in Goa, India, in long-term studies of particle fluxes in the western Arabian Sea (Western Arabian Sea Trap – WAST), in the equatorial Indian Ocean (EIOT) and in the southern Bay of Bengal (Southern Bay of Bengal Trap – SSBT). These studies were funded by the BMBF and the DFG within the framework of bilateral cooperation between India and Germany on the one hand and within the IGBP-JGOFS Process Study in the Arabian Sea on the other hand.

Several moorings with time series sediment traps were recovered in the Arabian Sea and one was redeployed in the western Arabian Sea during a research cruise on the Indian vessel RV »Sagar Kanya« in May 2001. During a cruise of the same vessel in

October 2001, two similar moorings were recovered and redeployed in the Bay of Bengal. The results from the analyses of these samples were subsequently incorporated in the existing long-term data records. Furthermore, for the station in the southern Bay of Bengal, it was possible to significantly extend the data records for the stable N-Isotopes.

The available long-term data sets provide a basis for investigating the links between monsoon and ENSO events and opens up the possibility to assess the reaction of oceans to global environmental and climatic changes. The work has allowed the completion of several Diploma and Masters theses. In the report period, scientists from the Indian partner institute NIO visited the ZMT to participate in planning for the workshop »Particle Fluxes in the Indian Ocean«, to be held in Goa in 2003.

Joint Global Ocean Flux Study in the Indian Ocean – JGOFS-Indik

INDIA

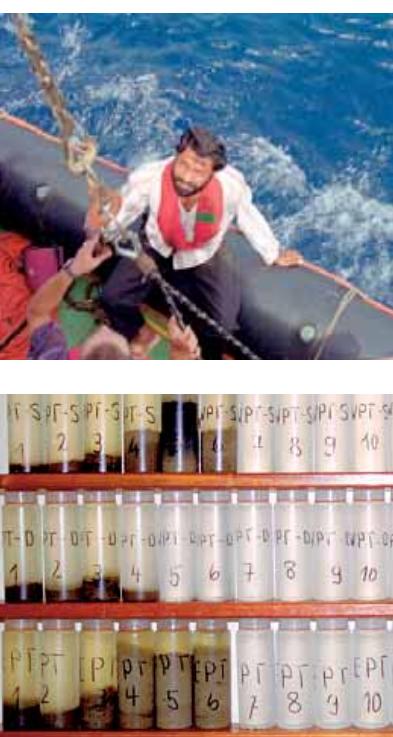

The International IGBP program »Joint Global Ocean Flux Study – JGOFS« examines the carbon cycle and its associated elements in various key regions of the ocean, in order to better predict anthropogenic influences on natural cycles and their resulting effects on climate. Since 1995, the cooperative project »Joint Global Ocean Flux Study – JGOFS-Indik« was funded by the BMBF as a contribution to the JGOFS-Process Study in the Arabian Sea, and since 2001 was coordinated by the ZMT. The final phase of the project was carried out within the overall international »JGOFS-Data Synthesis and Modeling« coordinated by the Institute of Oceanography, Kiel.

The study area is characterized by biogeochemical processes that are influenced by the Asian monsoon, receives both eolian and fluvial inputs and has a permanent mid-water oxygen minimum layer. Because of the expected impact on the carbon cycle and nutrient dynamics, the examination of the coupled carbon-nitrogen cycle was at the center of research.

Five subprojects of the program concentrated on the development of a three-dimensional, coupled ocean-atmosphere model.

Preliminary results that allow correlations between the strength of the monsoons and greenhouse gas emissions (CO_2 and N_2O) from the Arabian Sea to be quantified, were presented at the German JGOFS conference held at the Institute for Marine Research (IfM) in Kiel at the end of September 2002, and are presently being prepared for publication. Furthermore, it is planned to incorporate the insights on the coupled carbon-nitrogen cycle into global climate models. Due to the possibility of the development of »dead zones« in the sea from restricted oxygenation due to global warming, the knowledge of the processes from the northern Indian Ocean is increasingly gaining significance.

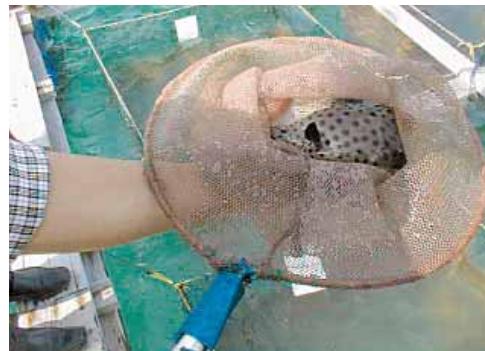

Principal investigators of the subprojects took part in the workshop on »Biogeochemical Processes in the Northern Indian Ocean« in early 2003, where results were discussed and a concluding report prepared. A synthesis book on the Indian Ocean is to be published before the concluding JGOFS Conference in Washington D.C. The German contribution to the international JGOFS-Indik synthesis was published in January of this year (JGOFS Report 35: www.uib.no/jgofs/jgofs.html).

Further Projects

The project »Impact of Shrimp Aquaculture Effluents on the Benthos Community in South Indian Coastal Waters«, a cooperation between the ZMT and the Fisheries College at the University of Agricultural Sciences in Mangalore, India, which is supported by the German-Indian scientific-technological collaboration, was completed at the end of 2001. A proposal on the »Impact of Shrimp Aquaculture Effluents on Adjacent Coastal Waters in South India« has been finalized. In November 2002, a German-Indian workshop took place at the ZMT during which future

collaboration on the subject of aquaculture was discussed.

INDIA

The Benguela Environment Fisheries Interaction and Training Program – BENEFIT

The »Benguela Environment Fisheries Interaction and Training Program – BENEFIT« is a regional research and development program with partners from Angola, Namibia and South Africa. The program is funded by several states, in particular by Germany and Norway. Within the context of this program, investigations are being carried out on the fishery resources in the Benguela upwelling areas, one of the most productive areas of the world's oceans. Besides fisheries-biological investigations on the size of stocks and issues surrounding recruitment, the project

on the ecology of fish larvae was conducted in Bremen in September 2000. In the meantime, the research results have been published in 16 manuscripts under participation of 48 authors and co-authors in the »South African Journal of Science« (Vol. 97, 2001).

Building on the cooperation forged during the 1999 expedition and the subsequent evaluation work, the ZMT has been carrying out investigations into the »Distribution Mechanisms of Zoo- and Ichthyoplankton in the Angola-Benguela Front«. This work is being conducted together with the working

SOUTHERN AFRICA REGION

focuses on the interaction of important species with their environment. Training and further education of young scientists of the region form another important aspect.

In 2000 and 2001, the data and samples that were obtained during the expedition on board the South African vessel FRS »Africana« were evaluated. A special course

group »Marine Zoology« at the University of Bremen and included a seagoing expedition with FRS »Africana« in February 2002. First results of this cruise were presented at the South African Marine Science Symposium in Swakopmund, Namibia, in July 2002, and led to the formulation of a new proposal on the influence of low oxygen on fish recruitment.

CUBA

Members of staff of the ZMT took part in the MARCUBA 2000 Congress on Marine Sciences in Havana in December 2000. The initial contacts at the meeting with marine researchers from the Cuban Instituto de Oceanología and from the Instituto de Ciencias Marinas de La Habana were used to discuss research areas for bilateral collaboration. Subsequently, a concept for the first phase of research cooperation between the

ZMT and the Cuban partners was developed. A proposal for cooperation was accepted by the Bremen Senate in October 2001, and a coordination unit for bilateral German-Cuban cooperation in marine research was established at the ZMT.

Among the unit's activities was the organization of a workshop funded by the BMBF and the Cuban Ministry for Science, Technology and the Environment (CITMA) on the subject of »Research for Sustainable Development« in Havana. The workshop provided a forum for the further development of cooperation initiatives. Official cooperation agreements between the Universities of Bremen and Havana were subsequently signed in 2002, on the basis of which the ZMT collaborates with the Centro de Investigaciones Marinas (CIM) and the Instituto de Oceanología (IdO).

In February 2002, the first German-Cuban planning workshop took place at the ZMT, which was attended by scientists from three Cuban institutions in Havana, the IdO, the CIM and the Centro de Investigaciones Pesqueras, as well as scientists from the Max-Planck-Institute (MPI) for Marine Microbiology in Bremen, the Terramare in Wilhelmshaven, the Alfred-Wegener-Institute in Bremerhaven, the Universities of Rostock, Oldenburg and Kiel, and the ZMT. The workshop created ideal conditions for

bringing together the bilateral study groups to develop common project plans. A bilateral project funded by the International Office (IB) of the BMBF since February 2002 now investigates questions concerning sustainable management of the Batabanó Gulf in Southern Cuba.

A second German-Cuban workshop funded by the Bremen Senate was organized in Havana in September 2002, at which the

joint project proposals were worked out in detail. From the German side, scientists from the MPI, Terramare and the ZMT, as well as representatives of the BMBF's International Bureau took part. Since November 2002, a Bilateral Project Office was established at the IdO in Havana, funded by the State of Bremen. The facilities at the Office are now available for use by the researchers involved in the bilateral collaboration.

Further to these activities, the DFG approved a project proposal to study the signals of past climate embedded in coral skeletons in Cuban waters, which will be co-ordinated by the ZMT and includes the participation of marine chemists and geologists from the University of Bremen. The project »Cuban European Climate Connection« has now been taken up for implementation.

VIETNAM

In 2000, the ZMT conducted a bilateral workshop on »Land-Sea Nutrient Fluxes« under the sponsorship of SCOPE, EU as well as the IB of the BMBF and in cooperation with the Institute of Oceanography in Nha Trang, Vietnam. The workshop, held at the Institute of Oceanography in Nha Trang, brought together German and Vietnamese marine scientists as well as representatives of the IB and the DAAD. Several project ideas were formulated and discussed. These were subsequently taken up by the Deutsche Forschungsgemeinschaft for further development.

In November 2001, a delegation conducted by the DFG, visited various research institutions and universities in Hanoi, Nha Trang, Da Nang and Ho Chi Minh City with the aim of meeting interested researchers. During the visit, preliminary research and training projects for cooperation were developed. They were finalized at a DFG/MOSTE planning workshop in Hanoi in May 2002, under the common theme of »Land-Ocean-Atmospheric Interactions in the Coastal Zone of Southern Vietnam«. The goal is to explore the coastal zone of the Southern

Chinese Sea between upwelling areas and the mangrove belt by a bilateral interdisciplinary research team. The study includes expeditions with the Vietnamese RV »Nghien Cuu Bien« to collect data on the transitional zone from land to ocean.

The ZMT is coordinating the entire project »Land-Ocean-Atmospheric Interactions in the Coastal Zone of Southern Vietnam«, and conducts its own research within the subproject on »Ecosystem Functioning of Rehabilitated versus Natural Mangroves in the Can Gio Reserve, Vietnam«.

Ecosystem Functioning of Rehabilitated versus Natural Mangroves in the Can Gio Reserve, Vietnam

The project concentrates on a mangrove region in the Saigon River Delta where reforestation measures have successfully been implemented for several decades. Here the question arises whether the reforested

mangroves are comparable to natural ones in functionality and stability. The project proposals were submitted to the DFG and the MOSTE for funding in summer 2002.

VIETNAM

Preliminary Studies on the Biogeochemistry of Small Rivers in Vietnam

The ZMT has been conducting the project »Preliminary Studies on the Biogeochemistry of Small Rivers in Vietnam« together with the Institute of Oceanography (IO) in Nha Trang, which was funded by the International Bureau of the German Federal Ministry of Education and Research and the Vietnamese Ministry of Science, Technology and Environment (MOSTE). The project collects data on the biogeochemical status of small rivers in Vietnam. During two joint expeditions (rainy

season, December; dry season, July), two rivers, one reservoir lake and some potential terrestrial sources like rice fields, aquaculture ponds and mangroves were sampled and the samples analyzed at the ZMT and the IO. In addition to the generation of new data on rivers of Vietnam, the project contributes to the training of young Vietnamese scientists in modern analytical methods in environmental and biogeochemical research at the ZMT.

VIETNAM

Modeling of the Ecological and Economic Effects of the »El Niño« Climate Phenomenon on the Multi-species Diving Fishery in South Peru

PERU

From 1998 to 2001, the ZMT carried out a project funded by the Volkswagen Foundation on »Modeling of the Ecological and Economic Effects of the »El Niño« Climate Phenomenon on the Biodiversity of Diving Fishery in Southern Peru« together with the Peruvian project partner from the Universidad Nacional Agraria La Molina in Lima.

Within the framework of the project, an international postgraduate course on »Food

Webs and Energy Flow in Marine Ecosystems: Theoretical Foundations, Applications and Modeling« was conducted on the Isla Independencia in Peru in early 2000.

The analysis of data collected during field work in 1999 produced three main results:
(1) A first empirical model was developed that permits a forecast of the magnitude of the scallop stock in the Independencia Bay, using information on the average water temperature during the six months period before and after the main reproductive period of the scallop. The fishing yield of the scallop is fundamentally a function of the minimum catch size. The reason is not only to be seen in the biomass maximization of the stock with advanced size (>60mm), but also in its

fertility, which increases exponentially with the size of the individual. If the mussels are collected when they are too small (as in 1997/8 during »El Niño«), the potential biomass of the present individual is not only unexploited, but the recruitment of the following generations is drastically reduced.

(2) The trophic modeling of the entire ecosystem of the Independencia Bay during

»El Niño« and normal meteorological periods shows that during »El Niño« primary production drastically decreases, but the efficiency of the energy transfer in between trophic levels increases and a shift in the dominance structure and relative biomass of species occurs. Both effects result in the increase of the fishing yield compared to a normal year.

(3) »El Niño« is hence to be regarded as a positive climate event with respect to invertebrate diving fishery. For the Independencia Bay this simultaneously means that the rich mussel population is also an attraction for visiting divers who will temporarily immigrate and hence contribute to the increase in fishing yield.

GHANA

The collaboration with the University of Cape Coast (UCC) goes back to the year 1997. It is primarily funded by the DAAD, and relies also on a Memorandum of Understanding (MoU) between the ZMT and the UCC.

The current cooperation is of benefit mainly for the ISATEC Program (s. below). The students of the program carry out their field work under the supervision of scientists from the Department of Zoology at the UCC.

The teaching activities of the ZMT are predominantly centered around the ISATEC program with almost all of its scientists participating in its execution. Furthermore, ZMT scientists offer lectures and seminars covering the traditional syllabus of Faculty 2

at the University of Bremen and conduct lectures at partner institutions in tropical countries. Students and researchers from these institutions regularly use the ZMT's library and laboratory facilities for their research.

International Studies in Aquatic Tropical Ecology – ISATEC

The international Master's course ISATEC (International Studies in Aquatic Tropical Ecology) has evolved well since its foundation in October 1999, both with respect to the fine tuning of the content within and between teaching modules, as well as the organization of the course by the ZMT. With the hiring of a coordinator in September 2001 as well as a tutor, the overall coordination of the program, the collaboration with the faculty administration as well as student mentoring could be substantially improved. The classes typically consist of one-third German and two-thirds foreign students. In September 2001, the first batch of 17 students received their Master of Science degrees. For the graduates of 2002, a graduation ceremony was organized.

Within the context of an accreditation procedure commissioned by the University of Bremen, the Accreditation, Certification and Quality Insurance Institute (ACQUIN) carried out a detailed evaluation of ISATEC in the first semester of 2002. This evaluation was based on a self-description of the course as well as on an internal survey carried out by a five-person expert panel. The Accreditation Commission came to the conclusion that ISATEC was »an exceptionally well qualified course of study, which is outstanding both with regard to content and concept«. In the combination of scientific and socio-economic expertise, as well as the conveying of scientific skills, the expert group perceived a successful expansion on traditional disciplines and an outstanding qualification for professional practice. Especially for foreign students, this combination would be a major criterion for the choice of the course. According to the expert commission, this kind of combination is unprecedented and unique in German higher education, and therefore deserves support from both the University and the State. The practical half-year in the

tropics is, despite occasional logistical complications, valued as particularly positive from both a technical and personal development perspective. The expert group confirmed the location of Bremen for ISATEC as being especially advantageous. A high level of disciplinary training is guaranteed by university institutions, as well as by linked institutes and external research institutions.

ISATEC is now part of the DAAD's focal program »Postgraduate Courses with Special Relevance to Developing Countries« and obtains seven full DAAD-scholarships for foreign participants.

Partner Program in Costa Rica – GIACT

Based on the European Union Project ALFA-COSTA, and coordinated by the ZMT, an international course of study GIACT (Gestión Integral de Áreas Costeras Tropicales) was developed at the University of Costa Rica with the participation of five Latin American and three European partners. GIACT is, like ISATEC, set to be multidisciplinary, and is

also supported by the EU via scholarships for participants of the ALFA network since 2002 including two scholarships for students from the University of Bremen. In the long term, a twinning of ISATEC and GIACT will be explored, allowing for the exchange of students between the two programs.

NEBROC

NEBROC – Netherlands Bremen Oceanography – is a program under which the Netherlands has created a network on education and research in marine sciences. The ZMT has been taking part in the program as

a member of the MARUM group of institutions since 1997. The ZMT's contribution centered around a Ph.D. thesis under which a comparative investigation of Caribbean and Indo-Pacific sponges was carried out.

Course Series »The Sea and its Resources«

The German-Indonesian cooperation plans training courses in the field of marine science at the participating Indonesian research institutes and universities. A series of courses consisting of several modules on the subject of »The Sea and its Resources« have been

drawn up. Among the courses already conducted are those in fisheries biology, which were held at the Jenderal Soedirman University in Purwokerto, Indonesia, in September 2002.

Publications

Members of the staff of the ZMT published around 100 articles in peer-reviewed scientific journals and over 30 other publications during the reporting period. The in-house »ZMT-Contributions« Series has grown to over 15 volumes. ZMT staff members were involved in the editing of the Proceedings of the SCOPE workshop on »Land-Ocean Nutrient Fluxes:

The Silica Cycle« as a special issue in Vietnam's »Collections of Marine Research Works«.

Through its Contact Office and with the support of partners in Indonesia and the Philippines, the ZMT published two brochures compiling information on potential cooperation partners from both academic and private sectors in those countries.

Events

The ZMT organized several national and international workshops and symposia during 2000-2002, either on its own or in partnership with international organizations such as the EU, SCOPE and IOI, and national organizations such as the CDG, DFG, DAAD, GTÖ, IB-BMBF, LAFEZ and WWF. They addressed issues ranging from education and research in marine sciences, ocean products and services to ocean governance. In addition, it organized workshops devoted to the development of new partnership projects in China, Cuba, India and Indonesia at its facilities in Bremen as well as in Cuba and Indonesia.

The major events will be described in the subsequent paragraphs; a complete list can be found in the appendix.

In March 2000, a symposium on »Sea and coast today – On the ecology of shallow waters« was organized by the ZMT and co-sponsored by MARUM. More than 200 marine ecologists from Germany participated in the symposium with presentations on a broad spectrum of the German marine ecological research in shallow water bodies of various climate zones.

At the end of September 2000, the ZMT organized the international SCOPE-workshop on »Land-Ocean Nutrient Fluxes: The Silica Cycle« in Nha Trang, Vietnam, in collaboration with the Institute of Oceanography in Nha Trang. It was followed by a week-long German-Vietnamese workshop as well as lectures and training courses for junior scientists and students.

During the period under review, bilateral German-Indonesian meetings took place in both Germany and Indonesia to prepare the

»Action Plan for the German-Indonesian Cooperation on Marine Research«. This included a major workshop in »Marine Science Education, Research and Development« in Purwokerto, Indonesia, at which approximately 100 marine scientists and representatives of governmental as well as non-governmental organizations met in March 2001. The event was carried out in collaboration with the Jakarta office of the DAAD as an alumni

seminar and hosted by the University Jenderal Soedirman in Purwokerto. Participants came from Indonesia and from the neighboring South East Asian countries, as well as from leading marine research institutes in Germany. Included among the participants were about 90 former DAAD-scholars. The discussions at the workshop formed the basis of bilateral partnership projects with Indonesia which were subsequently developed.

To celebrate the 10th anniversary of the founding of the ZMT, a »ZMT Forum for Partnership in Research and Education 2001« was organized on May 22, 2001. The guests of honor were the German Minister for Education and Research, Ms Edelgard Bulmahn, and Bremen's Senator for Education and Science, Willi Lemke. The forum mainly addressed the role of the State of Bremen and its marine science institutes, especially the ZMT, in the implementation of national efforts for international cooperation in marine research.

The ZMT hosted a meeting of the Executive Council of the International Ocean Institute (IOI) with the participation of Prof. Elizabeth Mann Borgese in September 2001. This was followed by a ZMT-IOI Workshop on »Ocean Resources, Services and Products«, which took place at and was sponsored by the Hanse-Wissenschafts-Kolleg (HWK) in Delmenhorst. The future collaboration between the IOI and the ZMT was discussed and a Memorandum of Understanding signed in Halifax in November 2001 with provisions for establishing an IOI Operational Center at ZMT.

SCOPE's XIth General Assembly and scientific symposia were held in Bremen in September 2001 upon invitation from the DFG and the German National Committee.

considered issues regarding the human uses of coastal zones and their resources (»Environmental Issues in the Management of the Coastal Zone«).

At the first German-Cuban workshop entitled »Towards a Sustainable Management and Conservation of Cuban Ecosystems«, held in February 2002 at the ZMT, there was wide attendance including researchers from Havana as well as colleagues from Rostock, Kiel, Oldenburg and Wilhelmshaven. At the workshop, the developments of joint projects were discussed, which were to be set in concrete terms at a follow-up workshop in Havana in September 2002.

In close collaboration with the Contact Office for Tropical Coastal Research, the Carl Duisberg Gesellschaft (CDG) held the course program on coastal zone management for COASTMAN partners twice within the reporting period. The Contact Office organized accompanying excursions to aquaculture facilities in Schleswig-Holstein, as well as to companies from the fishing industry in Bremerhaven and Cuxhaven.

Together with the WWF and CDG, the Contact Office prepared the international conference entitled »Ten Years after Rio«, held in Bremen in the summer of 2002 with approximately 100 participants.

The participants included delegates of the national and international member organizations associated with SCOPE and select guests from partner organizations as well as governmental and non-governmental organizations. Parallel to the general assembly, two scientific symposia were organized. One of them dealt with the global state of the environment and the new challenges to environmental scientists in a decade of political and socio-economical changes (»The 1990s: Unforeseen Challenges and Lessons for Environmental Sciences«). The other, mainly

With respect to the German-Indian cooperation on coastal aquaculture, coastal fishing and coastal management, the State Agency for Development Cooperation held a bilateral workshop at the ZMT in November 2002, which was attended by two representatives each from the College of Fisheries in Mangalore, the Center for Earth Science Studies in Thiruvananthapuram, and the Institute for Ocean Management in Chennai. On the German side, the ZMT, the MPI for Marine Microbiology in Bremen, and representatives from the BMBF participated.

The ZMT redesigned the institute logo and the website. All information is now available in both English and German versions of the website.

Since 2000, the media's attention to activities and events at the ZMT has increased. Press releases were distributed locally by the Senate's press office, and nationally via the distributor of the Informationsdienst Wissenschaft (IDW).

The exhibition »Marine Research Weeks«, which had attracted great response in 1998, was conceptualized as a touring exhibition by MARUM and was set up in and around Bremen. Reflecting the work done within the MADAM project, the ZMT presented itself with a poster sequence and exhibits on artisanal fishing in the mangrove.

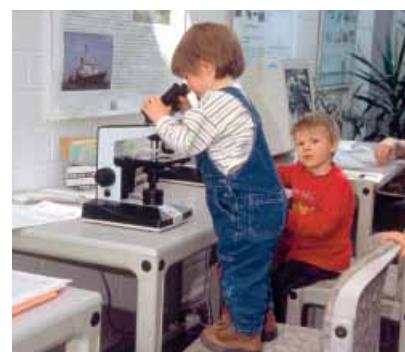

A children's film is being created in the context of the PUSH-program, which aims at promoting science communication. In the film, entitled »Adventures in the Coral Reef«, children will experience the vision of being submerged into caves of the coral reef as tiny beings where they will encounter a variety of different organisms. The project is supported by the »Stifterverband für die Deutsche Wissenschaft«. The filming took place in the Red Sea in cooperation with the MSS Aqaba and in a swimming pool in Worpswede, where the children were filmed. The computer animation was created by a company based in Munich. Accompanying information material is being produced in cooperation with children from a Montessori School in Munich.

The year 2002 was the »Year of the Geosciences«, in advance of which, the Bremen initiative »City of Science« called for the staging of five science Saturdays. They aimed to increase public awareness of Bremen and Bremerhaven as scientific locations. The ZMT was involved in the second science Saturday. The day was dedicated to university facilities on the main campus and the research institutions in Wiener Straße with the Fraunhofer Institute, the MPI for Marine Microbiology, the ZMT and the Universum Science Center. The ZMT's program included, amongst other things, a panel discussion with ISATEC students and the demonstration of fisheries biology research methods in the laboratory, as well as well-received children's games and drawing activities.

Furthermore, in July 2002 the ZMT was an attraction for the five so-called »Geo-tours«, which, based on a media partnership between MARUM and Bremen's daily newspapers, allowed an insight into Bremen's Geosciences and related fields for groups of 20 visitors each. With the slogan »Behind the Scenes«, readers of the daily newspapers were invited to participate in a competition to win a place in one of these visiting groups. The visitor group for the ZMT had to be narrowed down from 100 applicants. In various short presentations and visits to the laboratories the ZMT presented its research and training fields, where the concluding discussion and the many questions raised by the interested visitors made it clear that the ZMT had obtained a well known status amongst Bremen's population.

In the context of the »Year of the Geosciences«, the so-called »Science Summer« took place in Bremen at the end of August 2002, the climax of which was the »Long Night of the Sciences« on the 24th of August. Not only in the town center (Domshof), but also at the university and various other locations, interactive science was presented from the early evening until midnight, accompanied by artistic activities. As a member of the research association MARUM, the ZMT introduced itself with a film and poster presentation in the Glass Hall of the University and at the Domshof.

The ZMT scientists contributed popular science articles, for example for the year-book of the Wittheit 2001/2002, dedicated to marine research in the State of Bremen. The ZMT was also involved in the production of a monthly newsletter within the MADAM project called »Folha do Mangue« containing information for the local population and providing accompanying teaching material for schools in Belém and Bragança in Brazil. In the interactive science guide of Bremen, »City of Science«, the ZMT presents a short portrait of its project activities.

Administration

New research activities and the increasing number of examination candidates, as well as staff returning from the tropics, led to a rapid increase in the number of ZMT staff which called for a spatial expansion. In order to accommodate the increase, the ZMT moved from Bremen's Center for Innovation and Technology (BITZ) in Fahrenheitstraße 1 to a new building and annex in Fahrenheitstraße 6

in October 2000. Presently the ZMT has access to good infrastructure, with additional room capacity that can also provide space for events such as training courses, workshops or study group meetings of up to 80 participants. The annex accommodates the institution's library and additional offices.

Library

The comparatively small library stock, categorized into »ecology«, »marine ecosystems«, »fisheries biology« and »coastal management« sections, as well as some titles on socio-economics and biochemistry literature, has nonetheless grown steadily in the current report period. As a donation, the library obtained a near complete set of the series published by SCOPE. It was generally agreed not to expand the stock of the »Journal of Experimental Marine Biology and Ecology«, since the journal is available at the University library. Instead subscriptions

were made to »Estuarine Coastal and Shelf Science«, »Global Biogeochemical Cycles« and »Science«. The library is also the location for the theses of the Master's course ISATEC, which is conducted in collaboration with the University of Bremen. The library is a member of the German Association of Marine-Scientific libraries.

Laboratory

The development and refinement of analytical techniques were continued. This especially concerned the areas of mass spectrometry, amino acid analysis by HPLC and the analysis of organic acids via ion chromatography. With financial support from MARUM, various small apparatuses were purchased for use in biogeochemical work. New methods for opal determination and Winkler-Titration according to WOCE were introduced. The laboratory also has an automatic redox-titration system at its disposal, the DOC-quantification has been computerized and the phosphate analysis was optimized with the introduction of the FIAS-method (Flow Injection Analysis System). For this, a cooperation with the company Skalar in Erbelenz was established.

Good cooperation arrangements exist with the chemistry laboratories of the AWI in Bremerhaven, of the IfM and the Institute for Polar Ecology (IPÖ) in Kiel, of the IOW in Warnemünde, of the ICBB of the Uni-

versity of Oldenburg and of the neighboring institutes in Bremen (FB5, MPI).

Chemistry practicals of the ISATEC program are regularly held in the facilities of the ZMT.

EDP (Electronic Data Processing) and Data Management

With the move into the premises in Fahrenheitstraße 6 in October 2000, a newly installed Ethernet connection was put into operation which is connected to the campus network via optical fiber cables.

The administrative maintenance of the computers and network was taken care of by two employees of the Center for Applied Information Technology (Zentrum für Angewandte Informationstechnologien – ZAIT) of the University of Bremen on a contract

basis. Due to an increase in numbers of both staff and student bodies on one hand and the expansion of the computer network on the other, the demands of the ZMT could no longer be met. Therefore, a new post for the maintenance of the network, the homepage and workstation computers was set up and filled in November 2002.

Contact Office

The Contact Office at the ZMT was originally established in 1995 to act as a contact point providing information and services in education, research and development in the field of tropical marine ecology and to facilitate communication and cooperation between scientists and research institutions at national and international levels. For this, the Contact Office draws upon the enormous experience and expertise available at the ZMT through its international partnership projects in the tropics.

In addition to the routine duties concerning national and international communication as outlined above, its work during 2000-02 focused on three areas: (1) Establishment of contacts between the ZMT and the small and medium sized enterprises (SMEs), (2) Acquisition of funds for information surveys and pilot studies relating to fisheries management, and (3) Preparation of cooperation contracts and agreements with new partners.

The Contact Office is a member of the action group »Aquaculture«, which was founded by the Bremerhaven Investment and Town Development Agency (Bremerhaven Investitions- und Stadtentwicklungsellschaft – BIS), and which also counts representatives in the senate, investors, scientists and SMEs amongst its members. A preliminary study on the construction of aquaculture facilities, which was conducted in collaboration with the company ECOMARES in Büsum, was presented to the action group.

A cooperation agreement was made with the company of consulting engineers POLYPLAN in Bremen, which is responsible for the construction plans of an experimental facility at the ZMT.

The Contact Office contributed information for the development of a GTZ-sector project on the subject of »Code of Conduct« (FAO) in the field of »Fisheries in the Tropics« with the support from BMZ.

During 2000-02, the Contact Office prepared the Memorandum of Understanding with the National Aquatic Resource Agency (NARA) in Sri Lanka, as well as with universi-

ties in Indonesia, the Philippines and Malaysia. Furthermore, the Contact Office is involved in the selection and allocation of candidates for the DAAD special scholarship program »Marine Research«.

The evaluation of the old ZMT homepage has demonstrated that the page of the Contact Office is the ZMT's most frequently visited page, especially for brochure downloads.

The »International Ocean Institute« (IOI) was founded as a non-governmental organization by Prof. Elisabeth Mann Borgese in 1972. The IOI perceives its mission as being

Courtesy of the International Ocean Institute, Malta

a contributor to capacity building for the conservation of the marine environment and to the peaceful exploitation of the seas and their resources, through research, education and on the job training. The internationally renowned annual conference »Pacem in Maribus« contributes especially to this. Globally, the IOI today has 22 closely collaborating branches at its disposal and its headquarters in Malta. The IOI hence represents a unique global network that is coordinated from Malta.

In December 2000, the first »Pacem in Maribus« conference took place in Hamburg. A discussion forum considered the possibility of an IOI branch in Germany, and the ZMT was chosen as a cooperative partner for this. After the conference, Prof. Mann Borgese gathered information on the responsibilities

and structure of the ZMT in Bremen. Subsequently, the ZMT, together with the IOI and the Hanse Institute for Advanced Study, conducted a workshop on the topic of »Ocean Services and Products« in September 2001 in Delmenhorst. Prior to the workshop, the Executive Council of the IOI convened at the ZMT in order to discuss details of the cooperation. In November 2001, the IOI and ZMT signed a Memorandum of Understanding for the duration of 3 years in Halifax, Canada. On this basis, the IOI and ZMT want to gather expertise on the subject of »Ocean Science Contribution to the Service Economy«, which is then to be profitable to both in the form of jointly conducted courses of training and further education or projects in the marginal seas of Europe, in Southern Africa, as well as in South East Asia. The raising of funds for such activities is to take place jointly. Dr. W. Ekau was nominated for implementing the IOI-related activities at the ZMT.

Weiterentwicklung Action Plan, Jakarta, Bogor, Makassar, Indonesien, 11.-19.06.2001	Deutsche Luft- und Raumfahrt, Koordinierung, Köln, 12.02.2001
Internationale Einbindung der Projektförderung des BMBF in der Meeres-, Polar- und Geo-Forschung, BMBF, Bonn, 18.07.2001	Institute of Ecological Economics, Royal Swedish Academy of Science, Stockholm, Schweden, 12.-19.06.2001
University of Jordan, Aqaba, Marine Science Station, Amman, Jordanien, 01.-06.08.2001	Deutsche Luft- und Raumfahrt, Identifizierung von Trainingsgebieten im Landsat 7 ETM, Köln, 02.08.2001
Vorbesprechung Reise des Staatssekretärs Dr. Uwe Thomas nach Indien und Indonesien, Ref. 125, BMBF, Bonn, 03.09.2001	MADAM-Projekt, Begutachtung der 3. Projektphase, Belém, Bragança, Brasilien, 27.08.-06.09.2001
Action Plan Indonesien, Weiterentwicklung, Jakarta, Denpasar/Bali, Indonesien, 09.-14.09.2001	Deutsches Zentrum für Luft- und Raumfahrt, Abt. Umweltinformatik, MADAM-Projekt, Köln, 31.01.-01.02.2002
Begleitung des Staatssekretärs Dr. Ing. Uwe Thomas, Neu Delhi, Indien, Bali, Jakarta, Yogyakarta, Indonesien, 26.10.-06.11.2001	Deutsches Zentrum für Luft- und Raumfahrt, Abt. Umweltinformatik, MADAM-Projekt, Köln, 04.-07.06.2002
ECOMARES GmbH, Planung Aquakulturkooperation mit Indonesien, Büsum, 08.02.2002	Meersbiologisches Labor der Universität Stockholm, Department for Systems Ecology, Tjärnö, Schweden, 17.-28.07.2002
Entwicklung Aquakultur, Kieler Wirtschaftsministerium, Kiel, 08.02.2002	Deutsches Zentrum für Luft- und Raumfahrt, Abschlussarbeiten Phase 2 MADAM-Projekt, Köln, 02.-04.09.2002
Fortentwicklung der Indonesien-Kooperation, BMBF, Referat für Meeresforschung, Bonn, 11.04.2002	
Aquaculture Project Jordanien, IfM Kiel, 03.05.2002	
Indonesien-Kooperation, BMBF, Bonn, 20.08.2002	A. Kunzmann
Vorbereitung der Delegationsreise nach Indonesien, BMBF, Bonn, 27.08.2002	Vorbereitung der pre-JIGSE 2000 Expedition, Jakarta, Bogor, Purwokerto, Cilacap, Denpasar, Teilnahme am 9th Coral Reef Symposium der ISRS, Bali, Indonesien, 10.-24.10.2000
Kooperation »Biogeochemical Fluxes«, Goa, Indien, 02.-06.09.2002	Vorbereitung Besuch durch BIS und Bremer Senat, Fa. Butt, Kiel, Fa. Ecomares, Büsum, 20.05.2001
Planungsgespräche Australien/Neuseeland-Mission, IB des BMBF, Bonn-Oberkassel, 23.10.2002	Vorbesprechung des deutsch-indonesischen Joint-Committee in der Meeresforschung/Geowissenschaften, BMBF, Bonn, 01.06.2001
Planung der Koordination der Meeres- und Polarforschung Deutschlands, Berlin, 29.11.2002	Begleitung indonesische Delegation, Besichtigung von Fischverarbeitungsbetrieben, Aqua- und Marikultur, marine Naturstoffe,
Vorbereitung internationaler Workshop, Institute of Oceanography, Goa, Indien, 27.12.2002-11.01.2003	

PROJECT MEETINGS

	Cuxhaven und Bremerhaven, 28.06.2001 Fa. Butt, Kiel, Fa. Ecomares, Büsum, Besichtigung von Aquakulturanlagen durch den Initiativkreis Aquakultur Bremen- Bremerhaven, 03.07.2001 Indonesien-Kooperation, Bundesamt für Seeschifffahrt und Hydrographie, 18.10.2001 Kontaktaufbau zu klein- und mittelständischen Unternehmen, Besichtigung von Aquakul- tur- und Hälterungsanlagen, BAH Hamburg, Pinneberg, Stade, 02.11.2001 GTZ, Eschborn und BMZ, Bonn, 29.11.2001 Begleitung indonesische Delegation des DKP, Institut für Lebensmitteltechnologie und Bioverfahrenstechnik, Technologietrans- ferzentrum, Umweltinstitut, Bremerhaven, Husmann und Hahn, Cuxhaven, Maritimes Museum Tamm, Hamburg, 06.-07.12.2001 Bundesamt für Seeschifffahrt und Hydro- graphie, Vorbereitung TEMA Workshop, Hamburg, 04.02.2002 ECOMARES GmbH, Aquakulturokooperation mit Indonesien, Büsum, 08.02.2002 Biotechnologie-Zentrum, Bremerhaven, 03.05.2002 Aquakulturokooperation, BIS, Cuxhaven, BAH, Helgoland, 28.05.2002 Landesvertretung Schleswig-Holstein, Koo- perationsabkommen Aquakultur, Berlin, 06.06.2002 Vorbereitung BMBF-Workshop »Clean Aquacul- ture«, BIS, Bremerhaven, 24.06.2002 Vorbereitung BMBF-Workshop »Clean Aquacul- ture«, IPÖ und Technologie-Transfer- Zentrale Schleswig-Holstein (TTZ), Kiel, 28.-29.06.2002 Indonesien-Kooperation Aquaculture, Fa. BUTT, Bülk, Strande, 13.08.2002 Aquakulturokooperation UNSOED, ECOMA- RES GmbH, ZMT, Büsum, 15.08.2002 Kooperation Polykulturen Aquakultur, Langförden, 11.09.2002 Aquakulturanlagen, Büsum, Stade, 06.11.2002	Alfred-Wegener-Institut, Bremerhaven, 05.06.2002 Kooperationsprojekt mit Umweltstiftung Brasilien, UFZ, Leipzig, 03.-04.07.2002 Arbeitsgruppentreffen Aminosäure-Analytik, Alfred-Wegener-Institut, Bremerhaven, 03.09.2002
	O. Morisse Brau & Lübbe, Geräte-Vorführung, Nor- derstedt, 09.07.2002 Universität Hamburg, Vorbereitung Indonesi- en-Expedition, 16.09.2002	
	C. Richter Informationsreise Kooperation Korallenriff- forschung: LIPI und KEHATI Foundation, Jakarta, Universität in Bogor, Hassanuddin University in Makassar, South Sulawesi, Barrang Lompo Fieldstation der Hassanuddin University, Manado, Denpasar, Indonesien, 15.-22.10.2000 Fa. Knop, Aquarientechnik, Projekt Riesen- muschelzucht, Heidelberg/Pirmasens, 23.-24.04.2001 Planung eines Kooperationsvorhabens mit Prof. Rosenthal und Fa. Sander, Aquakultur von Riff-Zierorganismen in Aqaba, Rotes Meer, Hamburg, 28.05.2001 Institut für Pharmazeutische Biologie und Aqua-Zoo, Heinrich-Heine-Universität, Projektbesprechung »Chemical Ecology of Red Sea Sponges«, Düsseldorf, 31.05.2001 Projektkoordination, Publikationsvorbereitung, MSS, Aqaba, Jordanien, 03.-21.02.2002 Projektentwicklung mit Jordanien, MSS Aqaba, Jordanien, 01.-11.04.2002 DFG-Verbundprojekt »Primärproduktion und Mineralisierung in Korallenriffen«, MSS, Aqaba, Jordanien, 01.-11.04.2002 Projektentwicklung Aquakultur von Korallen- rifforganismen, IfM, Kiel, 03.05.2002 Benthopelagische Kooperation, AWI, Bremer- haven, 19.06.2002 Aquakultur-Projekt, IfM Kiel, Fa. Sander, Kiel, 25.11.2002 Informationsreise, AIMS, Townsville, UNSW, Sydney, Australien, 29.11.-13.12.2002	
	R. Lara MADAM, Planungsworkshop, Salinas, Brasilien, 28.-30.03.2001 MADAM-Projekt, Begutachtung der 3. Projekt- phase, Belém, Bragança, Brasilien, 26.08.- 21.09.2001 Diverse Planungstreffen zum interuniversitä- ren Millenium-Projekt, CNPq, Nucleo de Biologia Costeira, Bragança 2000 u. 2001 Arbeitsgruppentreffen Aminosäure-Analytik,	T. Rixen Paleo-JGOFS Task Team, Laboratoire des Sciences du Climat et de l'Environnement, Gif-sur-Yvette, Frankreich, 16.-17.11.2001 JGOFS Workshop, Institut für Meereskunde, Kiel, 26.-27.09.2002

PROJECT MEETINGS

Vorstellung des Forschungsprogrammes zur deutsch-kubanischen Zusammenarbeit in der Meeresforschung, IB/BMBF, Bonn, 11.12.2002

U. Saint-Paul

MADAM-Projekt, Begleitung Filmaufnahmen PRO7, Belém und Bragança, Brasilien, 26.01.-03.02.2000

Vorbereitung des Action Plan, Jakarta, Purwokerto, Cilacap, Indonesien, 31.10.-09.11.2000

Vorbereitung DFG/MOSTE Forschungsverbund Vietnam, ZMT, Bremen am 08.02.2002 und IfM, Hamburg, 30.04.2002 & 28.06.2002

DFG/MOSTE Planungsworkshop zur deutsch-vietnamesischen Kooperation, Hanoi, Vietnam, 12.-18.05.2002

Kooperationsprojekt mit Umweltstiftung Brasilien, UFZ, Leipzig, 03.-04.07.2002

Jenderal Soedirman University (UNSOED), Faculty of Biology, Purwokerto, Indonesien, 11.-25.09.2002

M. Wolff

Vorbereitung des Action Plan Jakarta, Purwokerto, Cilacap, Indonesien, Besuch des ICLARM, Malaysia, 31.10.-12.11.2000

El-Niño-Projekt, Universidad Agraria la Molina, Lima, Peru, 24.02.-12.03.2001

Vorbesprechung des deutsch-indonesischen Joint-Committee in der Meeresforschung/ Geowissenschaften, BMBF, Bonn, 01.06.2001

Projektvorbereitung »Concept note«, Kooperation ICLARM, Universität Hohenheim, 18.-19.02.2002

Instituto de Oceanología, Universidad de la Habana und Ministerio de Pesca, Kuba, Projektplanung,

D. Schories

MADAM, Planungsworkshop, Salinas, Brasilien, 28.-30.03.2001

A. Suthoff

Vorbesprechung des deutsch-indonesischen Joint-Committee in der Meeresforschung/Geowissenschaften, BMBF, Bonn, 01.06.2001

PAGES-JGOFS Task Team Workshop, Laboratoire des Sciences du Climat et de l'Environment, Gif-sur-Yvette, Frankreich, 14.-17.11.2001

JGOFS Synthese Workshop, Kiel, 05.-06.12.2001

JGOFS-Indik und DFG-Antrag Golf von Bengalen, Institut für Biogeochemie und Meereschemie, Max-Planck-Institut für Meteorologie, Hamburg, 06.-07.12.2001

JGOFS-Workshop, Institut für Biogeochemie und Meereschemie, Hamburg, 10.-11.06.2002

D. Unger

DFG-Antrag Golf von Bengalen, Verbundprojekt SIRRO, Institut für Biogeochemie und Meereschemie, Max-Planck-Institut für Meteorologie, Hamburg, 06.-07.12.2001

P. Westhaus-Ekau

Vorbesprechung des deutsch-indonesischen Joint-Committee in der Meeresforschung/Geowissenschaften, Bonn, BMBF, 01.06.2001

TEACHING AND TRAINING

ISATEC

International Studies in Aquatic Tropical Ecology – ISATEC (Leitung: M. Wolff, weitere Dozenten: U. Berger, M. Birkicht, S. Dittmann, W. Ekau, M. Glaser, T. Jennerjahn, G. Krause, A. Kunzmann, C. Richter, U. Saint-Paul, D. Schories, J. T. Salita), WS 1999/2000, SS 2000, WS 2000/2001, SS 2001, WS 2001/2002, SS 2002, WS 2002/2003

Lectures

Ringvorlesung im Hauptstudium Meeresbiologie (U. Saint-Paul, M. Wolff), WS 1999/2000, WS 2000/2001
Einführung in die Fischereiwissenschaft (U. Saint-Paul, W. Ekau), SS 2001
Einführung in die Palynologie und Vegetationsgeschichte der Erde (H. Behling), SS 2001, SS 2002
Biogeochemistry of tropical marine systems I and II; Vorlesung und Seminar (V. Ittekkot), SS 2001, WS 2001/2002, SS 2002
Vorlesung und Seminar: Vegetation und Ökologie der Tropen und Subtropen (H. Behling), SS 2002
Vorlesung und Seminar: Marine Biogeographie (S. Dittmann), SS 2002
Vorlesung: Lebensräume tropischer Küsten (S. Dittmann, A. Kunzmann, C. Richter), WS 2002/2003
Vorlesung und Seminar: Biogeochemistry of tropical marine systems (V. Ittekkot), WS 2002/2003
Vorlesung und Übung: Einführung in die Palynologie und Vegetationsgeschichte der Erde (H. Behling), WS 2002/2003

Practical Courses

Praktikum: Struktur und Funktion der Pflanzen I (H. Behling), SS 2000
Praktikum: Pollenanalytisches Praktikum mit Exkursion (H. Behling), SS 2001, SS 2002
Grundkurs: Ökologie (S. Dittmann), SS 2001
Praktikum: Einführung in die Fischereibiologie. Meeresökologisches Grundpraktikum (U. Saint-Paul, M. Wolff, W. Ekau, P. Westhaus-Ekau), SS 2002
Vorlesung und Übung: Einführung in die

Palynologie und Vegetationsgeschichte der Erde (H. Behling), WS 2002/2003

Übung: Paläoökologie, Palynologie – Anleitung zum selbstständigen wissenschaftlichen Arbeiten (H. Behling), WS 2002/2003

Seminars and Colloquia

Diplomanden-, Doktoranden- und Mitarbeiterseminar zur marinen Tropenökologie (S. Dittmann, V. Ittekkot, M. Kochzius, U. Saint-Paul, M. Wolff), WS 1999/2000, SS 2000, WS 2000/2001, SS 2001, WS 2001/2002, SS 2002

Tropenökologisches Seminar für Diplomanden und Doktoranden sowie Anleitung zum selbstständigen wissenschaftlichen Arbeiten (S. Dittmann, V. Ittekkot, U. Saint-Paul, M. Wolff), WS 2002/2003

Kolloquium zur marinen Tropenökologie (S. Dittmann, V. Ittekkot, M. Kochzius, U. Saint-Paul, M. Wolff und internationale Referenten), SS 2000, WS 2000/2001, SS 2001, WS 2001/2002, SS 2002, WS 2002/2003

Seminar: Konzepte der Benthosökologie (S. Dittmann), WS 2000/2001, WS 2001/2002, WS 2002/2003

Vorlesung und Seminar: Biogeochemistry of tropical marine systems I and II (V. Ittekkot, Balzer), SS 2002, WS 2002/2003

Vorlesung und Seminar: Vegetation und Ökologie der Tropen und Subtropen (H. Behling), SS 2002

Vorlesung und Seminar: Marine Biogeographie (S. Dittmann), SS 2002

Course Series »The Sea and its Resources«

Indonesien:

Course on Early Life History of Fish, Jenderal Soedirman University (UNSOED), Faculty of Biology, Purwokerto, 16.-21.09.2002 (P. Westhaus-Ekau, S. Kadler)

Course on Aging and Growth in Fish, Jenderal Soedirman University (UNSOED), Faculty of Biology, Purwokerto, 23.-29.09.2002 (W. Ekau, S. Kadler)

Kuba:

Trophiche Modellierung (in Spanisch), Centro de Investigaciones Pesqueras (CIP), Havanna, 16.-20.09.2002 (M. Wolff)

TEACHING AND TRAINING

Philippinen:

DAAD-Kurzzeitdozentur, »Marine Fishes«,
Manila, 12.10.-03.11.2001 (W. Ekau)
Short Training Course in Coral Reef Ecology,
Aquatic Science and Technology Institute
(ASTI), Palawan, 10.-28.01.2002
(A. Kunzmann)

Vietnam:

Short Course on Biogeochemistry and
Ecology of Tropical Coastal Seas, Institute
of Oceanography, Nha Trang, 29.09.-
02.10.2000 (V. Ittekkot, U. Saint-Paul)

Further Teaching in Partner Institutions

Brasilien:

Postgraduiertenkursus: Fische in Ästuaren
(in Portugiesisch), UFPa, Bragança,
20.11.-01.12.2000 (U. Saint-Paul)

Postgraduiertenkursus: Aquatic chemistry,
UFPa, Belém,
30.10.-03.11.2000 (R. Lara)

Seminário Regionalizado do Gerenciamento
Costeiro (Regional coastal management
seminar), SECTAM, Vigia, Pará,
20.-21.4.2001 (M. Glaser)

Master Course »Aquatique Chemie«
(in Portugiesisch), UFPa, Belém,
23.-27.04.2001 (R. Lara)

Spezialkurs »Paleovegetation dynamics:
evidence, analysis and interpretation«,
Universidade Federal do Rio Grande do
Sul (UFRGS) in Porto Alegre,
14.-22.03.2002 (H. Behling)

Postgraduiertenkurs: Interdisziplinarität und
sozialwissenschaftliche Methoden im
Küstenmanagement (in Portugiesisch),
Belém, 18.-29.11.2002 (M. Glaser)

Deutschland:

Mangrove research in the frame of integrated
coastal zone management. International
Doctoral Studies Program for Develop-
ment Research, Zentrum für Entwicklungs-
forschung (ZEF), 24.10.2002 (U. Saint-Paul)

Indien:

Marine Biogeochemistry, Institute of Oceanography, Goa, 04.-06.09.2002 (V. Ittekkot)

Peru:

Kursus: Nahrungsnetze und Energiefluß in
marinen Ökosystemen – Theoretische

Grundlagen, Anwendungen und Model-
lierung (in Spanisch), Universidad Agraria,
La Molina, 22.02.-03.03.2000 (M. Wolff)

Schweiz:

Paläökologische und paläoklimatische Studien
in tropischen und subtropischen Regionen
Südamerikas, Universität Bern,
06.-09.11.2002 (H. Behling)

Habilitations

Dr. Ruben Lara: Humic substances in the
marine environment: Characteristics and
role in the cycling of Carbon, Nitrogen and
Xenobiotics (Bremen 2000).

Dr. Hermann Behling: Spätquartäre paläökologische und paläoklimatische Studien an
neotropischen Ökosystemen basierend auf pollenanalytischen Untersuchungen
terrestrischer und mariner Sedimentkerne (Bremen 2001).

Dr. Sabine Dittmann: The ecology of benthic
communities in tropical tidal flats (Bremen
2001).

Doctoral Theses

Al-Najjar, Tariq H. (2000): The seasonal dynamics and razing control of phyto- and mesozooplankton in the northern Gulf of Aqaba (Hempel).

Diele, Karen (2000): Reproduction, population ecology and exploitation of the mangrove crab *Ucides cordatus* (Linnaeus, 1763) (Crustaceae, Decapoda Brachyura) in Northern Brazil (Saint-Paul).

Hildenbrandt, Hanno (2002): Simulationsmodelle zur Untersuchung der Dynamik von Mangrovenwäldern (Berger).

Jesse, Sandra (2001): Bedeutung der Großkrebs (Brachyura) für die Struktur und Trophodynamik sublitoraler Lebensgemeinschaften der chilenischen Küste (Wolff).

Jiménez, Carlos (2002): Effects of recent warming events on coral reef communities of Costa Rica (Central America) (Wolff).

Khalil, Ahmad S.M. (2001): Response of meiofauna to mangrove deforestation in arid coastal habitats of the Red Sea (Sudan) with emphasis on free-living marine nematodes. (Saint-Paul).

Koch, Boris (2002): Organic matter pathways in a mangrove system in Northern Brazil –

TEACHING AND TRAINING

- Chemical tracers of major sources under the influence of sedimentation and biological degradation (Lara).
- Kochzius, Marc (2002): Ecology, genetic population structure, and molecular phylogeny of fishes on coral reefs in the Gulf of Aqaba and northern Red Sea (Hempel).
- Mehlig, Ulf (2001): Variabilität von Primärproduktionsleistungen von Baum- und Straucharten der Mangrove von Bragança (Saint-Paul).
- Ortiz, Marco (2001): Holistic modelling of a subtidal benthic ecosystem of northern Chile (Tongoy Bay), to improve the knowledge and understanding of its structure and function: assessing the effects of intensive fisheries upon different invertebrates and algae species (Wolff).
- Salita, Joselita T. (2000): The influence of spatial arrangement of seagrasses on fish abundance in Bolinao, northern Philippines (Saint-Paul).
- Wunsch, Mark (2000): Exploration of structure and trophodynamics of coelobite (cavity-dwelling) communities in Red Sea coral reefs (Hempel).
- Ongoing:**
- Adams, Moira: Investigation of mangrove regeneration and succession in small, medium, and large scale areas after different kinds of disturbances (Berger).
- Aktani, Ungul: Fish communities as related to substrate characteristics in the coral reefs of Kepulauan Seribu Marine National Park, Indonesia, five years after stopping blast fishing practices (Wolff).
- Alpermann, Tilman: Räumlich explizite trophische Modellierung des Golfe de Batabanó durch GIS unterstützte ECOPATH Modelle (Wolff).
- Cohen, Marcelo: Past and current evolution of the Bragança mangroves - North Brazil (Saint-Paul).
- Cornils, Astrid: Bedeutung des Zooplanktons für die benthisch-pelagische Kopplung in Korallenriffen des Roten Meeres (Richter).
- Dominici, Arturo: Fish assemblage of the Central American Region: a comparison between both sides of the Isthmus of Panama (Wolff).
- Hüerkamp, Chistiane: Ernährungsphysiologische Untersuchungen an verschiedenen riffbildenden Korallen unter simulierten El Niño-Bedingungen (Wolff).
- Johnston, Gonzalo Rene Olivares: A metapopulation framework to study the influence of physical factors on recruitment variability of coastal benthic invertebrates in Central Chile (Wolff).
- Kober, Kerstin: Nahrungsökologie und Habitatnutzung von Schreit- und Wattvögeln im Ökosystem Mangrovenwald des Caeté Ästuars Nordbrasiliens (Saint-Paul).
- Kötter, Iris: Vergleichende Autökologie von Kryptofauna in der Karabik und im Roten Meer (Hempel).
- Krumme, Uwe: Wanderungsökologie und großräumige Bilanzierung der Verteilung von Fischen zwischen den Tidenkanälen der Mangrove und dem Caeté Ästuar (Saint-Paul).
- Mendoza, Ursula: Biochemie von Sedimenten (Saint-Paul).
- Menezes, Moirah: Investigations of the dynamic of mangrove forests by means of dendrochronological methods (Berger).
- Nordhaus, Inga: Ernährungsökologie der Mangrovenkrabbe *Ucides cordatus* (Ocydidae) im Caeté Mangrovenästuar, Pará, Nordost-Brasilien (Wolff).
- Porto, Fernando: Ecology and trophic relationships of zooplankton in the Tamandaré reefs, Pernambuco, Brazil (Saint-Paul).
- Protazio, Marcelo: The development of a methodology to detect and to analyze weak spatial ecological pattern (Berger).
- Reise, Anneken: Untersuchungen zur Gesamtbiomasse von Baumbeständen innerhalb des Mangrovengürtels bei Bragança im Bundesstaat Pará/Nordostbrasiliens (Saint-Paul).
- Roa Quiaoit, Hilly Ann: Rearing and reproduction of the giant clam (*Tridacna maxima*, *T. squamosa*) in the Gulf of Aqaba, Red Sea (Richter).
- Schmitt, Bettina: Charakterisierung von organischen Stickstoffverbindungen im Sediment und Wasser in einem Mangrovenökosystem Nordbrasiliens (Lara).
- Schroeder, Eva: Investigation of population dynamics including risk assessment of the crab *Ucides cordatus* (Berger).
- Szlafsztein, C.F.: Vulnerability and response measures to natural hazard and sea level rise impacts: Long term coastal zone management, NE of the State of Pará, Brazil (Lara).
- Velez, José: Funktion der Bucht von Independencia, Peru, als Larvenaufwuchsgebiet (Wolff).

TEACHING AND TRAINING

Waltemath, Maike: Ecological and economical impact of artificial reefs in Negros Oriental, Philippines, and implications for fishery management (Saint-Paul).

Diploma Theses

Baums, Iliana (2000): Population ecology and feeding physiology of *Coralliophila abbreviata*, Lamarck (Coralliophilidae), a corallivorous gastropod in the Florida Keys (Hempel).

Brenner, Matthias (2002): Nahrungsökologische Untersuchungen an ausgewählten Fischarten während der Regenzeit in der Mangrove vor Bragança (Pará, Brasilien) (Saint-Paul).

Buck, Bela Hieronymus (2000): Experimentally induced bleaching and recovery of *Tridacna gigas* (Saint-Paul).

Butgereit, Katja (2002): Die Bedeutung organischer Anreicherung durch Vogelkolonien auf ihre Umwelt: Beispiele von einer gemischten Brutkolonie des Scharlachibisses (*Eudocimus ruber*) in Nordostbrasilien (Saint-Paul).

Ewald, Marco (2000): Charakterisierung von Mikrosatelliten bei *Ucides cordatus* (Blohm/Saint-Paul).

Hamann, Katrin (2001): Jahreszeitliche Dynamik des Phytoplanktons und der Nährsalzkonzentration im Caeté-Ästuar (Bragança, Brasilien) (Saint-Paul).

Krumme, Uwe (2000): Gezeiteninduziertes Wanderverhalten von Fischen (Pisces) in der Mangrove vor Bragança (Pará, Brasilien) (Saint-Paul).

Janzen, Katja (2002): Der Scharlachibis (*Eudocimus ruber*). Ökologische und sozio-ökonomische Untersuchungen als Basis eines Schutzkonzeptes im Bundesstaat Pará, Nordbrasilien (Saint-Paul).

Lang, Marc (2000): Ursachen der kleinräumigen Verteilung und Bestandsstruktur der Pilgermuschel *Argopecten purpuratus* im Fischereigebiet von Pisco (Wolff).

Loick, Natalie (2001): Identification of different water bodies by seven indicator calanoid copepods in the Angola-Benguela front system (Saint-Paul).

Mühlig-Hoffmann, Annette (2001): The distribution of corals and macroalgae in relation to freshwater and sediment discharge on a fringing reef in Kane'ohe Bay, O'Ahu, Hawai'i (Saint-Paul).

Pasenau, Ilka (2000): Raubdruck und Schwarmverhalten verschiedener Altersgruppen bei *Neopomacentrus miryae* (Pomacentridae: Teleostei) und *Pseudanthias squamipinnis* (Serranidae: Teleostei) (Hempel).

Schaub, Christoph (2000): Untersuchung der Großreusenfischerei im Ästuar des Rio Caeté/Nordbrasilien (Saint-Paul).

Tsounis, Georgios (2001): Territoriality in the mangrove blenny (Garman 1903) *Omobranchus rotundiceps obliquus* (Blennidae), home range size in response to nest removal (Saint-Paul).

Ongoing:

da Rocha, Régine Elisabeth: Nahrungsökologische Untersuchungen an Fischgemeinschaften im Ästuar von Paranaguá (Saint-Paul).

de Feitas, Ynglea Georgina: A Comunidade íctica de uma lagoa no manguezal de Bragança – PA (Saint-Paul).

Gieseler, Jörn-Steffen: Nahrungsökologische Untersuchungen an Fischgemeinschaften im Ästuar von Paranaguá (South Brazilian coast) (Saint-Paul).

Schweers, Tanja: Populationsdynamische Untersuchungen an der Schokoladenmuschel *Megapitaria squalida* (Sowerby, 1835) in der Bahía Magdalena, Baja California (Mexiko) (Wolff).

Stoll, Ursula: Biogeochemical fluxes in the Indonesian Sea (Ittekkot).

ISATEC Master Theses 2001

Acheampong, Emmanuel (Ghana): Distribution of Macrozoobenthos abundance and biomass in intertidal soft sediments of North-East Brazil (Dittmann, Saint-Paul).

Aggrey-Finn, Joseph (Ghana): The structure of the artisanal fisheries in central Ghana and observations on the biology of their important species (Ekau, Saint-Paul).

Alpermann, Tilman Jens (Deutschland): The fisheries of ornamental fishes in Guanacaste, Costa Rica, with special emphasis on the population dynamics of the Cortez Rainbow Wrasse, *Thalassoma lucasanum* (Gill 1863) (Wolff, Cortés Nuñez).

Bednarski, Melinda (USA): Macrozooplankton of Culebra Bay, Costa Rica, with an Emphasis on Copepods (Wolff, Morales-Ramirez).

Benards, Okeyo (Kenia): Transplantation of Coral Fragments for the Restoration of Coral Reefs in Mombasa-Kenya (Breckling, Ruf).

TEACHING AND TRAINING

- Cermak, Monika (Deutschland): Assessment of the Profitability of Four Artisanal Fishing Techniques at Elmina, Central Region, Ghana (Saint-Paul, Ekau).
- Darkoh, Charles (Ghana): Impact of human activities on the breeding success of mallard, *Anas Platyrhynchos* (Breckling, Reuter).
- Freytag, Iris (Deutschland): Growth and mortality of *Acropora nobilis* (Anthozoa: Scleractinia) fragments in shallow waters of the Seribu Islands, Indonesia, using different attachment methods (Kunzmann, Wolff).
- Leal Flórez, Jenny (Kolumbien): Feeding ecology of *uricia branca*, *Cathorops agassizii*, (Pisces: Ariidae), in an intertidal channel of the Caeté estuary, Northern Brazil (Saint-Paul, Wolff).
- McInnerney, Caitriona (Irland): The Ecology of coral diseases in the Gulf of Aqaba, Jordan (Richter, Breckling).
- Nasution, Ichwan Makmur (Indonesien): Fisheries condition in the Segara Anakan Lagoon, Cilacap, Central Java, Indonesia (Wolff, Brey).
- Niemann, Helge (Deutschland): Gravity currents and their effect on phytoplankton and nutrients in the Gulf of Aqaba, Red Sea (Ittekkot, Richter).
- Packeiser, Tim (Deutschland): Development of a management plan for the sea turtle conservation project at Playa Platarnes, Peninsula de Osa, Costa Rica (Wolff, Govan).
- Schmidt, Stefanie (Deutschland): Population ecology & fishery of the gastropod *Cittarium pica* along the Caribbean Coast of Costa Rica (Wolff, Zamora).
- Slade, Christopher Lawrence (USA): The ecology of Trichodinids (Ciliophora: Peritrichida) from Southwest Java, Indonesia, with taxonomic descriptions (Kunzmann, Palm).
- Wiemann, Annika (Deutschland): Aspects of the artisanal beach seine fishery in the Cape Coast area, Ghana (Ekau, Saint-Paul).
- Yasman, Yasman (Indonesien): The guild of Phyllidiids from Thousand Islands National Park Indonesia with special reference to the feeding biology and chemical ecology of *Phyllidia varicosa* Lamarck, 1801 (Wolff, Proksch).
- ISATEC Master Theses 2002**
- Ameyaw Asiedu, Godfred (Ghana): The Role of Chironomid Larvae (*Chironomus riparius* and *C. plumosus*, Diptera) in Regenerating Nitrogen in Limnic Sediments via Ammonium Excretion (Jørgensen, Stief).
- Asare, Noble Kwame (Ghana): The Influence of some Environmental Processes on Vertical Particle Flux in the Bay of Bengal, Indian Ocean (Jennerjahn, Ittekkot).
- Aziz, Poppy (Indonesien): Benthic Survey of Small Size Infauna in Several Bays on the Coast of West Sumatra, Indonesia (Dittmann, Nurdin).
- Beyer, Kathleen (Deutschland): Investigations into the Reproductive Biology and Ecology of Olive Ridley Turtles (*Lepidochelys olivacea* [Escholtz, 1829]) at Old Ningo Beach, Ghana, West Africa (Ekau, Breckling).
- Campion, Benjamin Betey (Ghana): A Comparative Study of the Benthic Communities of the Fosu and the Brenu Akyinim Lagoons of Ghana (Dittmann, Ekau).
- Darmawan, Rahmania (Indonesien): Influence of Eutrophication on the Phytoplankton Assemblage of Jakarta Bay, Indonesia (Kirst, Wolff).
- Gomez, José (Spanien): Maintaining Fisheries Resources off Yala National Park: a contribution based on Historical, Biological and Socio-Economic data (Kunzmann, Breckling).
- Gonelli, Sabine (Deutschland): Characteristics of Coral Mucus and Adsorption of Matter (Hagen, Hüttel).
- Hutahaean, Andreas Albertino (Indonesien): Sediment as Archive of Heavy Metal Pollution in Zanzibar Islands, Tanzania (Balzer, Jennerjahn).
- Keuter, Sabine (Deutschland): Socio-economic Analysis of a Fishermen's Association in Tortugas Bay, Northern Peru, with Special Emphasis on its Activity of Scallop (*A. purpuratus*) Bottom Culture (Wolff, Mendo).
- Mackensen, Annika (Deutschland): Contributions to Sea Turtle Conservation in Sri Lanka: Growth Rates, Socio-economic Data and Nesting Patterns (Kunzmann, Amarasooriya).
- Mahon, Anne Marie (Irland): Impact of Effluent Waters of a Fish Processing Plant on the Species Assemblage in the Rocky Intertidal of Herradura Bay, Northern Chile (Wolff, Stotz).
- Moroff, Nadine E. (Namibia): Determination of spatial and temporal patterns of seaweed cast along Herradura Beach, Chile, as a basis for beach management (Wolff, Stotz).

TEACHING AND TRAINING

Mwangamilo, Julitha J. (Tansania): Nutritional Studies on Milkfish (*Chanos chanos*) and the Development of a Practical Feed for its Culture in Zanzibar (Saint-Paul, Ekau).

Porst, Gwendolin (Deutschland): Ecological Feasibility of Scallop (*Argopecten purpuratus*) Bottom Culture in Tortugas Bay, Northern Peru (Wolff, Mendo).

Suwandana, Endan (Indonesien): Economic Valuation of Segara Anakan Mangrove Ecosystem, Central Java, Indonesia (Breckling, Kuma, Wolff).

Woyt, Holger (Deutschland): Quantification of Coral Mucus Release (Hagen, Hüttel).

EVENTS AT ZMT

- 14.01.2000: Sitzung zur Entwicklung der WTZ mit Brasilien
- 19.01.2000: RSP-Treffen der deutschen Themensprecher
- 29.-30.03.2000: Meeresökologisches Symposium: »Meer und Strand – Zur Ökologie der Flachgewässerforschung«
- 02.05.2000: preJIGSE-Treffen der deutschen Teilnehmer zur Vorbereitung der Expedition
- 03.05.2000: »Küstenmanagement«, Kurs, Dr. Michael H. Rieß, Büro für Integrierten Umweltschutz CDG, Bremen
- 11.05.2000: Auswertung »Meteor«-Reise 44/2 Frühjahr 1999
- 12.05.2000: DGM-Vorstandssitzung
- 29.05.2000: BENEFIT, Gründungssitzung des Steering Committee
- 07.06.2000: SCOPE, Landesausschuß
- 16.06.2000: Begutachtung der Kontaktstelle
- 04.07.2000: Auswertung »Meteor-Reise« 44/2 Frühjahr 1999
- 09.07.2000: Antragsvorbereitung Expedition FS »Sonne«
- 28.08.-16.09.2000: »Early life history of fishes«, BENEFIT-Kurs mit Teilnehmern aus Angola, Namibia und Südafrika
- 14.09.2000: preJIGSE-Treffen der deutschen Teilnehmer zur Vorbereitung der Expedition
- 13.-18.11.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences – A bilateral meeting for project development
- 24.11.2000: 13. Sitzung der Deputation für Wissenschaft
- 29.11.2000: Sitzung des ZMT-Kuratoriums
- 07.12.2000: Informationsveranstaltung für die Delegation des International Ocean Institute (IOI) unter Leitung von Prof. Elisabeth Mann Borgese
- 13.-16.02.2001: 14. Jahrestagung der Gesellschaft für Tropenökologie e.V.
- 07.-18.05.2001: Train-of-Trainer Workshop for COASTMAN-Partners from Asia - Strengthening Skills and Competences for Integrated Coastal Zone Management Training (Dozenten: Dr. Jutta Berninghausen, Dr. Marion Glaser, Dr. Andreas Kunzmann, Saskia Morell)
- 22.05.2001: »ZMT-Forum for Partnership in Research and Education 2001«, unter der Schirmherrschaft von Bundesforschungsministerin Edelgard Bulmahn, BMBF, Bonn
- 27.06.2001: 2nd Steering Committee Meeting
- of DKP-RISTEK-BMBF Delegation on Earth and Ocean Sciences
- 04.-06.09.2001: IOI-Executive Council Meeting
- 21.-28.09.2001: XIth General Assembly of the Scientific Committee on Problems of the Environment – SCOPE and adjacent Workshops
- 26.09.2001: Abschlußveranstaltung des ISATEC-Studienganges 1999-2001
- 19.10.2001: Besuch des German-Chinese Steering Committee of Marine Science and Geotechnologies
- 30.10.2001: Stipendiaten-Auswahlsitzung des DAAD und ISATEC
- 07.11.2001: Sitzung des ZMT-Kuratoriums
- 25.-28.02.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- 12.04.2002: I. Marikultur-Gespräch mit Vertretern des BMBF und der Länder Bremen und Schleswig-Holstein
- 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- 22.-23.05.2002: Akkreditierung des ISATEC Studienganges
- 27.05.-07.06.2002: Train-of-Trainer Workshop for COASTMAN-Partners from Latin-America – Strengthening Skills and Competences for Integrated Coastal Zone Management Training (Dozenten: Gracia Ortiz, Carmen Candeló, Dr. Covadonga Orejas, Dr. Carlos Jiménez, Dr. Ralf Schwamborn), 23 Teilnehmer
- 01.06.2002: 2. Sonnabend der Wissenschaft. Expedition Wiener Straße
- 25.07.2002: Medienpartnerschaft Weser Kurier/MARUM »GeoTouren – Hinter den Kulissen«
- 08.08.2002: SCOPE Landesausschuss-Sitzung
- 04.-7.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- 06.11.2002: Sitzung des ZMT-Kuratoriums
- 27.11.2002: Arbeitstreffen zur deutsch-kubanischen Kooperation
- 04.12.2002: Besuch Seiner Exzellenz, des Botschafters der Republik Indien in Berlin, Herrn T.C.A. Rangachari, Gesprächsrunde mit Vertretern des ZMT, UFT, ZARM und Geowissenschaften

VISITORS AND GUEST RESEARCHERS

- Prof. Dr. Taufik **Abdullah**, Direktor, LIPI, Indonesien; 09.04.2002
- Prof. Ahmed **Abu-Hilal**, Bahrain; 07.12.2000: Informationsveranstaltung für die Delegation des International Ocean Institute (IOI) unter Leitung von Prof. Elisabeth Mann Borgese
- M. Sc. Enzo **Acuña Soto**, Dekan der Meeresfakultät der Universidad Católica del Norte, Coquimbo, Chile; 13.08.2001
- Dr. Seno **Adi**, BPPT, Jakarta, Indonesien; 16.-17.09.2002
- M.Sc. Consuelo **Aguilar**, Centro de Investigaciones Marinas (CIM) Universidad de la Habana, Havanna, Kuba; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Prof. Dr. H. Muchtar **Ahmad**, Rector, University of Riau, Department of National Education, Pekanbaru, Indonesien; 22.01.-01.03.2002
- Dr. Salim **Al-Moghrabi**, Marine Science Station, Aqaba, Jordanien ; 02.-29.08.2000
- Nidal **Al-Ouran**, Executive Director, Jordan Royal Ecological Diving Society, Jordanien; 06.-20.04.2000
- Dr. Ziad **Al-Zubairi**, Marine Science and Resources Research Centre, Aden, Jemen; 09.-10.01.2001; 10.01.2001: Colloquium for tropical marine ecology: »Marine research activities in Jemen«
- Dr. Pedro **Alcolado**, Instituto de Oceanología, Havanna, Kuba; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Dr. **Aliaga**, UNESCO, Paris; 20.03.2002
- Prof. Dr. Ing. Iskandar **Alisjahbana**, Rektor a.D., ITB Bandung, Entrepreneur in Biotech and Aquaculture, Indonesien; 22.04.2002
- Prof. Dr. A. Mappadjantji **Amien**, UNHAS, Indonesien; 27.03.2002
- Prof. Dr. Rudolf **Amann**, Max Planck Institute für Marine Mikrobiologie, Bremen; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- Prof. Dr. Nguyen Tac **An**, Institute of Oceanography, Cao Da, Nha Trang, Vietnam; 25.05.-06.06.2000
- Wang **Antao**, Program Officer, Department of International Cooperation, SOA, Beijing, China, German-Chinese Steering Committee of Marine Science and Geotechnologies; 19.10.2001: Besuch des German-Chinese Steering Committee of Marine Science and Geotechnologies
- Dr. Arsenio **Areces**, Instituto de Oceanología, Havanna, Kuba; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«; 08.-23.12.2002
- Dr. Harald **Asmus**, Alfred-Wegener-Institut, Sylt; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Dr. M. **Baba**, Director, Centre for Earth Science Studies, Thiruvananthapuram, Indien; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- Dr. Mohammad Ibrahim **Badran**, Marine Science Station, Aqaba, Jordanien; 28.-31.05.2001; 12.-14.12.2001; 08.-10.08.2002
- Prof. Dr. Wolfgang **Balzer**, Universität Bremen; 23.01.2002; 21.02.2002; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien; 18.06.2002
- Dr. Masako Otsuka **Bannai**, International Ocean Institute, Japan; 07.12.2000: Informationsveranstaltung für die Delegation des International Ocean Institute (IOI) unter Leitung von Prof. Elisabeth Mann Borgese
- Dr. Julian **Barbière**, IOC, Paris; 14.08.2002
- Dr. Mario **Barletta**, Universidade Federal do Para, Pontal do Sul, Brasilien; 31.09.-30.10.2001; 21.11.2001: Colloquium for tropical marine ecology, »Seasonal changes of fish communities (density, biomass and diversity) in the Paranaguá Bay estuary (subtropical Brazil)«
- Victoria de **Barros Neto**, Institute for Fisheries Research, Luanda, Angola; 29.-30.05.2000: BENEFIT, Gründungs-sitzung des Steering Committee
- Ir. Jamal **Basmal**, DKP, Meeresministerium, Dep. Foodprocessing, Indonesien; 03.-08.12.2001

VISITORS AND GUEST RESEARCHERS

- Dr. Dirk **de Beer**, Max Planck Institut für Marine Mikrobiologie, Bremen; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«; 13.11.2002; 27.11.2002: Arbeitstreffen zur deutsch-kubanischen Kooperation
- M.Sc. Maria **Berger**, James Cook University, Australien; 07.02.2002: Colloquium for tropical marine ecology, »Selecting sites for marine protected areas on coral reefs: Do biodiversity approaches for corals and fish work?«
- Dr. Patricio **Bernal**, UNESCO, Paris; 20.03.2002
- H. **Biber**, Wissenschaftsjournalist, N3, Brixenstadt; 07.09.2000
- Dr. Holger **Biensold**, Bremer Senat für Bildung und Wissenschaft, Bremen; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«; 21.03.2002
- Dr. M. **Bilio**, University of Arhus, Dänemark; 17.-18.01.2000
- Prof. Dr. Ralf **Bill**, Institut für Geodäsie and Geoinformatik, Universität Rostock; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Jacobo **Blanco**, INVEMAR, Sta Marta, Kolumbien; 19.05.-02.06.2001
- Dr. John **Blay**, Department of Zoology, University of Cape Coast, Ghana; 21.-25.05.2001
- Manfred **Bode**, Landesamt für Entwicklungszusammenarbeit, Bremen; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«; 12.08.2002; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- Dr. Alexandru S. **Bologa**, International Ocean Institute, Schwarzes Meer, Rumänien; 07.12.2000: Informationsveranstaltung für die Delegation des International Ocean Institute (IOI) unter Leitung von Prof. Elisabeth Mann Borgese
- Dave **Boyer**, National Marine Information and Research Centre, Swakopmund, Na-
- mibia; 29.-30.05.2000: BENEFIT, Gründungssitzung des Steering Committee
- Prof. Dr Sabine **Bröck**, Konrektorin für Internationale Angelegenheiten, Universität Bremen; 28.02.2002; 04.12.2002: Besuch Seiner Exzellenz, des Botschafters der Republik Indien in Berlin, Herrn T.C.A. Rangachari, Gesprächsrunde mit Vertretern des ZMT, UFT, ZARM und Geowissenschaften
- Bernadette **Brown**, Maribus Industries (Pty) Ltd, South Africa; 14.-22.12.2002
- Dr. Dorothea **Brückner**, FB 2-Uni-Bremen; 24.07.2002
- Prof. Dr. Fritz **Buchholz**, BAH des AWI, Helgoland; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- Bundesforschungsministerin Edelgard **Bulmahn**, BMBF, Bonn; 22.05.2001: ZMT-Forum for Partnership in Research and Education 2001 unter der Schirmherrschaft von Bundesforschungsministerin Edelgard Bulmahn, BMBF, Bonn
- M.Sc. Mauricio **Camargo**, UFPa/MADAM Projekt, Campus Universitário de Belém, Brasilien, Ph.D. student; 08.09.-01.10.2000
- M.Sc. Monika **Cermak**, Universität Heidelberg; 25.09.2002
- Dr. Sandra **Child**, ICLARM, Head, Information & Communication; 14.09.2000
- Dr. Catriona **Clemmesen**, IfM Kiel; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- Rudi **Cloete**, National Marine Information and Research Centre, Swakopmund, Namibia; 28.08.-15.09.2000: »Early life history of fishes«, BENEFIT-Kurs mit Teilnehmern aus Angola, Namibia und Südafrika
- Mrs. Anita **Coady** (Treasurer, USA), IOI Executive Council; 04.-06.09.2001: IOI Executive Council Meeting
- Sirit **Coeppicus**, Universität Aachen; 01.02.2002
- Prof. Dr. Yehuda **Cohen**, Division of Microbial and Molecular Ecology, Institute of Life Sciences, The Hebrew University of Jerusalem, Israel; 16.05.2002
- Prof. Dr. Jorge **Cortes**, Universidad de Costa Rica, Centro de Investigaciones Marinas e Limnologicas (CIMAR); 12.02.-12.03.2002; 21.02.2002: Colloquium for

VISITORS AND GUEST RESEARCHERS

- tropical marine ecology: »Marine environments and research in Costa Rica«
- Prof. Dr. Maria Iracilda **da Cunha Sampaio**, UFPa/MADAM Projekt, Campus Universitário de Belém, Brasilien; 08.-09.09.2000
- Dr. Rokhmin **Dahuri**, Director General, Ministry of Maritime Affairs and Fisheries, Jakarta Selatan, Indonesien; 07.11.2000; 07.12.2001
- Dr. Ir. Darnas **Dana**, Vice Rector, Bogor Agricultural University, Bogor, Indonesien; 02.-08.01.2001
- Dr. Boedi **Darma**, Attaché Education and Culture, Embassy of the Republic of Indonesia, Berlin ; 15.11.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences – A bilateral meeting for project development
- Wang **Dianchang**, Deputy Director General, Department of Science and Technology, SOA, Beijing, China, German-Chinese Steering Committee of Marine Science and Geotechnologies; 19.10.2001: Besuch des German-Chinese Steering Committee of Marine Science and Geotechnologies
- Dr. Oliver **Diehl**, Internationales Büro des DLR/BMBF, Bonn; 16.01.2002; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Dr. Marlene **Diekmann**, Beratungsgruppe Entwicklungsorientierte Agrarforschung (BEAF), Bonn; 14.09.2000
- Dr. Nicolas **Dittert**, Universität Brest, Brest; 19.11.2001
- Yusuf **Djajadihardja**, Competence Manager of Marine Division, Agency for the Assessment and Application of Technology – BPPT, Jakarta, Indonesien; 12.-18.11.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences – A bilateral meeting for project development
- Dr. Walter **Dörhage**, Senator für Bildung und Wissenschaft, Bremen; 10.12.2001
- Dr. Magdy Mohammad **Dowidar**, National Institute of Oceanography and Fisheries NIOF, Alexandria, Ägypten; 05.04.-16.04.2000; 28.04.-17.05.2000; 15.08.-26.09.2000
- Tan **Duo**, Deputy Director General, First Institute of Oceanography, SOA, Qingdao, China, German-Chinese Steering Committee of Marine Science and Geotechnologies; 19.10.2001: Besuch des German-Chinese Steering Committee of Marine Science and Geotechnologies
- B.Sc. Van Thang **Duong**, Institute of Oceanography, Nha Trang, Vietnam; 23.09.-21.11.2002
- Dr. Gisela **Dybowski**, Bundesinstitut für Berufsbildung (BIBB), Bonn; 25.01.2002
- Dr. Hans **Eggers**, BMBF, Bonn; 18.09.2001; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- Frau **Eichler**, Landesamt für Entwicklungszusammenarbeit, Bremen; 12.08.2002; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- Dr. Mohammed **El-Zibdeh**, Marine Science Station, Aqaba, Jordanien ; 23.06.-10.07.2000; 28.-31.05.2001
- M.Sc. Sri **Fatimah**, UNRI, Universität Riau, Indonesien; 05.02.-05.03.2002; 25.02.2002: Colloquium for tropical marine ecology: »Determinant factors of information seeking related to development issues among working women«
- Dr. Susanne **Faulhaber**, Deutsche Forschungsgemeinschaft Bonn; 11.12.2000; 08.02.2002
- Prof. Dr. José Francisco **da Fonseca Ramos**, UFPa/MADAM Projekt, Campus Universitário de Belém, Brasilien; 11.-15.09.2000
- Dr. Antonio **de Fontes Pereiro**, Institute for Fisheries Research, Luanda, Angola; 29.-30.05.2000: BENEFIT, Gründungssitzung des Steering Committee
- Dr. Martin **Foth**, Carl Duisberg Gesellschaft (CDG), Bremen; 23.01.2002; 12.08.2002; 27.11.2002: Arbeitstreffen zur deutsch-kubanischen Kooperation
- Dr. Martin **Foth**, Internationale Weiterbildung und Entwicklung GmbH, Bremen; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- Dr. Angela **Franz**, MediaCompany, Bonn; 14.09.2000
- Dr. Jan Stefan **Fritz**, Internationales Büro, BMBF, Bonn; 14.08.2002
- Dr. Rainer **Fröse**, IfM Kiel; 12.12.2002:

VISITORS AND GUEST RESEARCHERS

- Colloquium for tropical marine ecology:
»FishBase: a Tool for Tropical Fisheries Biologist«
- M.Sc. Tawfiq **Froukh**, Marine Science Station, Aqaba, Jordanien, Ph.D. student; 16.06.-18.08.2000; 19.07.2000: Colloquium for tropical marine ecology: »Fish larvae in the Gulf of Aqaba, Red Sea«
- Dr. Richard **Fuchs**, International Foundation for Science, Stockholm, Schweden; 06.04.2000
- Prof. Tsutomu **Fuse** (Japan), IOI Executive Council; 04.-06.09.2001: IOI-Executive Council Meeting
- Dr. Gernot **Gad**, DFG Bonn; 08.02.2002
- Basri M. Ganie, BPPT, Jakarta, Indonesien; 01.-05.08.2002
- Prof. Dr. Radi A. **Gany**, Rector Hasanuddin University (UNHAS), Makassar, Indonesien; 27.03.2002
- Cecil **Giddey**, Marine and Coastal Management, Capetown, South Africa; 28.08.-15.09.2000: »Early life history of fishes«, BENEFIT-Kurs mit Teilnehmern aus Angola, Namibia und Südafrika
- Dr. Josep Maria **Gili i Sardá**, Instituto de Ciencies del Mar de Barcelona, Spanien; 08.-23.12.2002
- Hugh **Govan**, TUVA Foundation, Costa Rica; 05.06.2000: Colloquium for tropical marine ecology: »The quality of qualitative data: Involving the fishermen in research for the conservation of the Danube sturgeon populations«
- Dr. V. S. **Gowri**, Institute for Ocean Management – Anna University, Chennai, Indien; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- Dr. Stewart **Grant**, ICLARM, Program Leader, Biodiversity and Genetic Resources, Research Program; 14.09.2000
- Dr. **Grollmann**, Geschäftsführer, Bremer Innovations-Agentur (BIA), Bremen; 24.07.2002
- Dr. Hans-Peter **Grossart**, Institut für Chemie und Biologie des Meeres, Universität Oldenburg; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- M.Sc. Elena **de la Guardia**, Centro de Investigaciones Marinas (CIM) Universidad de la Habana, Havanna, Kuba; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Dr. Venkat R. **Gunale**, University of Pune, Indien; 31.05.2000: Colloquium for tropical marine ecology: »Biomonitoring of Pune River Water Quality«
- Dr. M.V.S. **Guptha**, National Institute of Oceanography, Geological Department, Dona Paula, Goa, Indien; 24.10.-15.11.2002
- Herr **Hamacher**, Wissenschaftsjournalist, Harburger Anzeiger und Nachrichten, Hamburg; 07.09.2000
- Dr. Hashali **Hamukuaya**, Ministry for Marine Research, Windhoek, Namibia; 29.-30.05.2000: BENEFIT, Gründungssitzung des Steering Committee
- Dr. **Hansen**, Deutsche Forschungsgemeinschaft Bonn; 11.12.2000
- Dr. Alexander P. **Hansen**, German Advisor to the Minister of State for Research and Technology, Jakarta, Indonesien; 24.07.2002
- Ir. Sriworo **Hariyono**, Deputy Minister for Research, Science and Technology Programs, MEN RISTEC, Indonesien; 27.06.2001: 2nd Steering Committee Meeting of DKP-RISTEK-BMBF Delegation on Earth and Ocean Sciences
- Dr. Joachim **Harms**, Projektträger Warne-münde; 16.06.2000: Begutachtung der Kontaktstelle; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- Frau **Hasenmüller**, International Office, Universität Bremen; 27.11.2002: Arbeits-treffen zur deutsch-kubanischen Koope-ration
- Prof. Gotthilf **Hempel**, Bremen Marketing, Bremen; 07.12.2000: Informationsver-anstaltung für die Delegation des International Ocean Institute (IOI) unter Leitung von Prof. Elisabeth Mann Borgese; 22.05.2001: ZMT-Forum for Partnership in Research and Education 2001 unter der Schirmherrschaft von Bundesfor-schungsministerin Edelgard Bulmahn, BMBF, Bonn; 04.12.2002: Besuch Seiner Exzellenz, des Botschafters der Republik Indien in Berlin, Herrn T.C.A. Rangachari, Gesprächsrunde mit Vertretern des ZMT, UFT, ZARM und Geowissenschaften

VISITORS AND GUEST RESEARCHERS

- M.Sc. Marcelino **Hernández**, Instituto de Oceanología, Havanna, Kuba; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Dr. Bambang **Herunadi**, Agency for the Assessment and Application of Technology - BPPT, Jakarta, Indonesien; 27.08.-05.09.2000; 05.-16.03.2001; 06.03.2001: Colloquium for tropical marine ecology: »Physical Oceanography of Indonesian Waters«
- Dr. Charles **Hocutt**, BENEFIT-Office, Swakopmund, Namibia; 29.-30.05.2000
- PD Dr. Christiane **Höller**, Institut für Umweltmedizin, Umwelttoxikologie und Hygiene, Universität Kiel; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- E.-M. **Hongsernant**, Internationales Büro des BMBF beim DLR, Bonn, German-Chinese Steering Committee of Marine Science and Geotechnologies; 19.10.2001: Besuch des German-Chinese Steering Committee of Marine Science and Geotechnologies
- Dr. Chr. **Humborg**, Dep. of Systems Ecology, Stockholm University, Stockholm; 20.11.2002: Colloquium for tropical marine ecology: »DSi and main element dynamics in subarctic Swedish rivers: The significance of vegetation on nutrient land-sea fluxes«
- Dr. Markus **Hüttel**, Max Planck Institut für Marine Mikrobiologie, Bremen; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Dr. Maria Elena **Ibarra**, Centro de Investigaciones Marinas (CIM) Universidad de la Habana, Havanna, Kuba; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Prof. Dr. Victoria **Isaac**, UFPa/MADAM Projekt, Campus Universitário de Belém, Brasilien; 08.-26.09.2000
- Dr. Rahardjo **Jamtomo**, Ambassador of the Republic of Indonesia, Indonesien; 07.12.2001
- Dr. Daniel **Jamu**, ICLARM, Project Leader Aquaculture Research and Development for Smallholder Farms in Southern Africa; 14.09.2000
- Susan **Jones**, Marine and Coastal Management, Kapstadt, Südafrika; 03.-30.10.2002
- Peter **Jordanan**, Maribus Industries (Pty) Ltd, South Africa; 14.-22.12.2002
- Arzhang **Kahlili**, MPI marine Mikrobiologie, Bremen; 27.11.2002: Arbeitstreffen zur deutsch-kubanischen Kooperation
- Dr. Kuria K. **Kairu**, International Ocean Institute, Kenia; 07.12.2000: Informationsveranstaltung für die Delegation des International Ocean Institute (IOI) unter Leitung von Prof. Elisabeth Mann Borgese; 04.-06.09.2001: IOI-Executive Council Meeting
- Dr. **Kannen**, FTZ-Westküste, Büsum; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- Prof. Dr. I. **Karunasagar**, Head of College of Fisheries, Department of Fishery Microbiology, University of Agricultural Sciences, Mangalore, Indien; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- Dr. Hodaka **Kawahata**, Geological Survey of Japan, Ibaraki, Japan; 31.03.2001

- Victor H. Marin, Universidad de Chile; 12.06.2000: Colloquium for tropical marine ecology: »A spatially explicit model of the Antarctic krill fishery«
- Prof. Eduardo Marone, Brasilien; 07.12.2000: Informationsveranstaltung für die Delegation des International Ocean Institute (IOI) unter Leitung von Prof. Elisabeth Mann Borgese
- M.Sc. Juan Carlos Martínez, Instituto de Oceanología, Havanna, Kuba; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Dr. Farid Ma'ruf, Director of Research and Living Resources Exploration, Ministry of Maritime Affairs and Fisheries, Jakarta Selatan, Indonesien; 12.-18.11.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences - A bilateral meeting for project development
- Prof. Dr. Roberto Mayerle, Corelab, Universität Kiel; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien; 18.06.2002
- Professora Marleni Marques-Toigo, Universidade Federal do Rio Grande do Sul, Instituto de Geociências – Curso de Pós-Graduação em Geociências, Porto Alegre, Brasilien; 28.-30.08.2002
- Humberto Medina, Landesamt für Entwicklungszusammenarbeit, Bremen; 25.02.-

VISITORS AND GUEST RESEARCHERS

- 01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Dr. Claudia Mendo**, Universidad Nacional Agraria La Molina, Lima, Peru; 04.-05.01.2001
- Dr. Jaime Mendo Aguilar**, Universidad Nacional Agraria La Molina, Lima, Peru; 04.06.-03.07.2000, 05.-18.08.2001
- Karin Meyer**, DAAD Stipendiatin, Universidade Federal do Rio Grande do Sul, Universität Tübingen; 28.-30.08.2002
- Dr. Meyer**, Bundesforschungsanstalt für Fischerei, Hamburg; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- M.Sc. Elena Miravet**, Instituto de Oceanología, Havanna, Kuba; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Prof. Dr. Rubiyanto Misman**, Rector of University Jendral Soedirman – UNSOED, Purwokerto, Indonesien; 12.-18.11.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences – A bilateral meeting for project development; 20.-21.05.2002
- Dr. Alvaro Morales**, Universidad de Costa Rica, San José, Centro de Investigaciones Marinas e Limnologicas (CIMAR); 10.07.-08.08.2000
- Prof. Dr. Osmund D. Mwandemele**, Dekan, UNAM, Windhoek, Namibia; 10.05.2000
- Ursula Niebling**, Senator für Bildung und Wissenschaft, Bremen; 27.11.2002: Arbeitstreffen zur deutsch-kubanischen Kooperation
- Dr. Jon Norberg**, Dept. of Systems Ecology, Stockholm University; 06.05.2002: Colloquium for tropical marine ecology: »Analysing resilience in socio-ecological systems (SES's)«
- Alfredo Novoa Pena**, Botschafter der Republik Peru, Berlin; 07.10.2002
- M.Sc. Sutopo Purwo Nugroho**, BPPT, Jakarta, Indonesien; 18.09.-16.10.2002
- M.Sc. Claudia Nunes**, UFPa/MADAM Projekt, Campus Universitário de Belém, Brasilien, Ph.D. student; 27.08.-28.11.2001
- Nidal Odat**, Marine Science Station, Aqaba, Jordanien, M.Sc. student;
- 10.04. - 09.06.2000
Evelyn Oetjen, Senator für Bildung und Wissenschaft, Bremen; 21.03.2002
- Dr. Oliounine**, International Ocean Institute (IOI), Malta; 12.06.2002
- Herr Ollig**, BMBF, Bonn, German-Chinese Steering Committee of Marine Science and Geotechnologies; 19.10.2001: Besuch des German-Chinese Steering Committee of Marine Science and Geotechnologies
- Dr. Francesco Pagés**, Instituto de Ciencias del Mar, Barcelona; 08.01.2002
- Tito Eko Pararto**, M.Sc., Agency for the Assessment and Application of Technology (BPPT), Jakarta, Indonesien; 11.11.-15.12.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences - A bilateral meeting for project development
- Dr. G.M. Parthiban**, National Institute of Oceanography, Geological Department, Dona Paula, Goa, Indien; 24.10.-15.11.2002
- Dr. Jürgen Pätzold**, Universität Bremen; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- Veronique Plocq-Fichelet**, SCOPE Secretariat, Paris; 08.-10.11.2002
- Dr. Denise Pope**, Department of Animal Behaviour, University of Copenhagen; 13.03.2002: Colloquium for tropical marine ecology: »Communication and mating behaviour of fiddler crabs (genus Uca)«
- Frau Powell**, Wissenschaftsjournalistin, 3SAT, Mainz; 07.09.2000
- Dr. Mark Prein**, ICLARM, Program Leader, Freshwater Resources Research Program; 14.09.2000
- Dr. Kim Prochazka**, Director International Ocean Institute, Southern Africa, University of the Western Cape, South Africa; 12.-13.08.2002
- Mr. Herie Purwanto**, BPPT, Jakarta, Indonesien; 19.02.-16.03.2001
- Ida Bagus Putujandra**, General Consul, Indonesisches Generalkonsulat Hamburg; 22.04.2002
- Zhang Qing**, Deputy Director Division of Science & Technology, Second Institute of Oceanography, SOA, Hangzhou, China, German-Chinese Steering Committee of Marine Science and Geotechnologies; 19.10.2001: Besuch des German-Chinese

VISITORS AND GUEST RESEARCHERS

- Steering Committee of Marine Science and Geotechnologies
- Dr. Nasser Saber Abdel Rahman**, National Institute of Oceanography and Fisheries NIOF, Suez, Ägypten; 14.02.-26.03.2000
- Prof. Dr. D. Rajasenan**, Cochin University of Science and Technology, Kerala, Indien; 21.-25.08.2000
- Dr. S. Ramachandran**, Institute for Ocean Management – Anna University, Chennai, Indien; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Co-operation between partners from South India and Bremen, Germany
- Herr T.C.A. Rangachari**, Botschafter der Republik Indien in Berlin; 04.12.2002: Besuch des ZMT und Gesprächsrunde mit Vertretern des ZMT, UFT, ZARM und Geowissenschaften
- Mohammed Rasheed**, Marine Science Station, Aqaba, Jordanien; 03.04.2000
- Dr. K. Reise**, Alfred-Wegener-Institute, Bremerhaven; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources Cooperation between partners from South India and Bremen, Germany
- Dr. Michael H. Rieß**, Büro für Integrierten Umweltschutz: Leiter des CDG-Kurses »Küstenmanagement«; 03.05.2000
- Prof. Dr. Jackson Roehrig**, Institut für Tropentechnologie der Fachhochschule Köln; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Prof. Dr. Harald Rosenthal**, Hamburg; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- Catarina Ruby**, Institute of Sea Fisheries Research, Luanda, Angola; 28.08.-15.09.2000: »Early life history of fishes«, BENEFIT-Kurs mit Teilnehmern aus Angola, Namibia und Südafrika
- Dr. Vladimir Ryabinin**, IOI Executive Director, Malta; 04.-06.09.2001: IOI-Executive Council Meeting
- Dr. Joko Samiaji**, University of Riau, Faculty of Fishery and Marine Science, Pekanbaru, Indonesien; 24.04.2002: Colloquium for tropical marine ecology: »Feasibly cooperations in marine science between University of Riau and German Insti-
- tutes«; 02.03.2002-28.02.2003
- Ing. Martin Sander**, Fa. Sander, Uetze-Elze; 21.10.2002
- Rosa Maria Saraiva**, Bragança, Brasilien; 14.09.-25.10.2001
- Areef Sardar**, National Institute of Oceanography, Goa, Indien; 02.-23.07.2001
- Prof. Dr. Sasekumar**, University of Malaysia, Kuala Lumpur, Malaysia; 09.04.-30.05.2001; 26.04.2001: Colloquium for tropical marine ecology: »Mangrove systems in Malaysia«; 03.05.2001: Colloquium for tropical marine ecology: »Environmental problems in the Straits of Malacca«; 15.05.2001: Colloquium for tropical marine ecology: »Mudflat ecology in Malaysia«
- Dr. Sawangwong**, Thailand, International Affairs of Burapha University, Cholburi, Thailand; 03.-18.05.2002
- PD Dr. Sigrid Schiel**, Alfred-Wegener-Institut, Bremerhaven; 27.02.2002
- Dr. Ekhard Schmidt**, DAAD; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Prof. Dr. Horacio Schneider**, UFPA/MA-DAM Projekt, Campus Universitário de Belém, Brasilien; 08.-09.09.2000; 10.05.-10.08.2002
- Dr. Martin Schneider**, UNAM, Windhoek, Namibia; 10.05.2000
- Honorarkonsul Artur Schnitger**, Bremen; 07.10.2002
- Dr. Schröder**, Bundesforschungsanstalt für Fischerei, Hamburg; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- Dr. Gerlind Schütte**, Senator für Wirtschaft und Häfen, Ref. Technologie und Innovation, Bremen; 16.07.2002
- Dr. Ralf Schwamborn**, Departamento de Oceanografia, Universidade Federal de Pernambuco, Recife, Brasilien; 24.05.-08.06.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- Dr. Neville Seijd**, Chief Executive Officer, BENEFIT, Swakopmund, Namibia; 02.-05.06.2002
- Dr. Bambang Setiadi**, Deputy Chairman BPPT, Jakarta, Indonesien; 31.07.-06.08.2002

VISITORS AND GUEST RESEARCHERS

- Dr. Boedi Darma **Sidi**, Cultural Attaché, Embassy of Indonesia, Indonesien; 07.12.2001
- Dr. **Soeprihono**, Director of Segara Anakan Conservation and Development Project Cilacap, Indonesien; 12.-18.11.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences - A bilateral meeting for project development
- Dr. Indroyono **Soesilo**, Chairman, Agency for Marine Research and Fisheries, DKP, Indonesien; 27.06.2001: 2nd Steering Committee Meeting of DKP-RISTEK-BMBF Delegation on Earth and Ocean Sciences; 07.12.2001
- Dr. K. **Soman**, Head, Resources Analysis Division, Centre for Earth Science Studies, Akkulam, Indien; 18.07.-01.08.2001; 04.-08.11.2002: Training – education – research in the field of management of coastal and marine resources – Cooperation between partners from South India and Bremen, Germany
- Cidiane **Sousa-Soares**, UFPa, Campus Universitário de Belém, Brasilien, Bachelor student; 31.08.-15.10.2001
- Prof. Robin **South** (South Pacific, Fiji), IOI Executive Council; 04.-06.09.2001: IOI Executive Council Meeting
- Prof. Dr. Karl **Stattegger**, Universität Kiel; 08.02.2002
- Dr. Christian **Stienen**, BMBF, Bonn; 21.03.2002
- Dr. Wolfgang **Stotz**, Universidad Católica del Norte, Coquimbo, Chile; 10.05.-16.06.2001; 06.06.2001: Colloquium for tropical marine ecology: »Experiences with a co-management project with the diving-fishery in Chile«
- Dr. Dieter **Strohm**, Geschäftsführer RF Reedereigemeinschaft Forschungsschiffahrt, Bremen; 17.01.2002
- Dr. Awal **Subandar**, Agency for the Assessment and Application of Technology – BPPT, Jakarta, Indonesien; 27.08.-05.09.2000
- M. Sc. Nana **Sudiana**, Ir., Agency for the Assessment and Application of Technology (BPPT), Jakarta, Indonesien; 11.11.-15.12.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences - A bilateral meeting for project development; 18.09.-16.10.2002
- Dr. Isdy **Sulistyo**, Purwokerto University, Indonesien; 12.-26.08.2002
- Dr. Ono Kurnaen **Sumardhiharga**, Natio-
- nal Academy of Sciences – LIPI, Research and Development Centre for Oceanology, Jakarta, Indonesien; 12.-18.11.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences – A bilateral meeting for project development
- Dr. **Sylvester**, Programmleiter »Postgraduate Studies with Relevance to Developing Countries«, DAAD, Bonn; 31.10.2001
- M.Sc. Claudio **Szlafsztein**, UFPa/MADAM Projekt, Campus Universitário de Belém, Brasilien, Ph.D. student; 08.-14.09.2000; 11.04.2001: Colloquium for tropical marine ecology: »Longt-term coastal management - state of Pará, Brazil«; 07.11.2001: Colloquium for tropical marine ecology: »Sea level and response measures on the NE coast of the State of Pará«; 07.10.-09.11.2002; 15.05.-28.06.2002; 12.11.-10.12.2002
- T. **Tanci**, Marine and Coastal Management, Capetown, South Africa; 28.08.-15.09.2000: »Early life history of fishes«, BENEFIT-Kurs mit Teilnehmern aus Angola, Namibia und Südafrika
- Dr. Fernand **Tchuenguem**, Kamerun; 24.07.2002
- Dr. Guy F. de **Téramond-Peralta**, Universidad de Costa Rica, San José, Costa Rica; 18.09.2002
- Dr. Stefan **Thiesen**, Mind Quest, Selm; 14.12.2000: Colloquium for tropical marine ecology: »Tropical ocean fertilization for atmospheric CO₂ sequestration: serious option or technological folly?«
- Dr. H. **Thomas**, Nederlands Instituut voor Onderzoek der Zee (NIOZ), Texel; 01.10.2002
- Prof. Dr. Jürgen **Timm**, Rektor der Universität Bremen; 22.05.2001: ZMT-Forum for Partnership in Research and Education 2001 unter der Schirmherrschaft von Bundesforschungsministerin Edelgard Bulmahn, BMBF, Bonn
- M.Sc. Ernesto **Tristá**, Instituto de Oceanología, Havanna, Kuba; 25.02.-01.03.2002: Cuban-German Workshop »Towards a sustainable management and conservation of Cuban coastal ecosystems«
- Dr. **Unluate**, UNESCO, Paris; 20.03.2002
- Dr. M.N. **Venugopal**, University of Agricultural Sciences, College of Fisheries, Mangalore, Indien; 25.01.2001: Colloquium for tropical marine ecology: »Indian marine fisheries – an overview«; 08.02.2001:

VISITORS AND GUEST RESEARCHERS

- Colloquium for tropical marine ecology: »Molecular approaches for the diagnosis of microbial diseases of shrimps«
- Dr. Jennifer **Verduin**, Hamburg; 20.02.2001: Colloquium for tropical marine ecology: »Hydrodynamics and pollination in seagrass habitats of the coast of W.-Australia«
- Dr. Hans **Verheyen**, Marine and Coastal Management, Capetown, South Africa; 28.08.-15.09.2000: »Early life history of fishes«, BENEFIT-Kurs mit Teilnehmern aus Angola, Namibia und Südafrika; 22.09.-07.10.2001; 03.-30.10.2002; 22.10.2002: Colloquium for tropical marine ecology: »Do diatoms depress copepod egg hatching, thus challenging the classical view of energy flow in (marine) aquatic food webs?«
- Fernando **Vijayan**, National Institute of Oceanography, Goa, Indien; 02.-23.07.2001
- Prof. Dr. Syarifuddin **Wahid**, UNHAS, Indonesien; 27.03.2002
- Dr. Pedro **Walfir Souza Filho**, Belém, Brasilien; 28.04.-27.05.2002
- Dr. Uwe **Waller**, Institut für Meereskunde, Kiel; 21.10.2002
- Dr. Joseph **Warioba**, IOI President, Tanzania; 04.-06.09.2001: IOI-Executive Council Meeting
- Prof. Dr. G. **Wefer**, Geowissenschaften, Universität Bremen; 04.12.2002: Besuch Seiner Exzellenz, des Botschafters der Republik Indien in Berlin, Herrn T.C.A. Rangachari, Gesprächsrunde mit Vertretern des ZMT, UFT, ZARM und Geowissenschaften
- Prof. Hou **Wenfeng**, International Ocean Institute, China; 07.12.2000: Informationsveranstaltung für die Delegation des International Ocean Institute (IOI) unter Leitung von Prof. Elisabeth Mann Borgese
- Prof. Dr. Friedrich **Widdel**, MPI Bremen; 08.02.2002
- Dr. M. **Wiebelt**, Institut für Weltwirtschaft an der Universität Kiel, Abteilung Umwelt- und Ressourcenmanagement; 16.06.2000: Begutachtung der Kontaktstelle
- Dr. Meryl J. **Williams**, ICLARM, Director General; 14.09.2000
- Dr. Ivor **Willimans**, NIOZ, Texel; 28.11.2002: Colloquium for tropical marine ecology: »Macroalgae overgrowth of Caribbean reefs: the roles of overfishing, management, and declining coral cover«
- Prof. Dr. **Winand**, Gesamthochschule Kassel, Lehrstuhl für Wirtschaftsinformatik; 16.06.2000: Begutachtung der Kontaktstelle
- Elke **Wolff**, Bundesministerium für Technische Zusammenarbeit, Bonn; 14.09.2000
- Dr. Ying **Wu**, State Key Laboratory of Estuarine and Coastal Research, East China Normal University, Shanghai, China; 07.03.-05.05.2002; 03.04.2002: Colloquium for tropical marine ecology: »Isotope variability of particulate organic matter at the PN section in the East China Sea«
- Fan **Xiaoli**, Deputy Director General, Department of International Cooperation, State Oceanic Administration (SOA), Beijing, China, German-Chinese Steering Committee of Marine Science and Geotechnologies; 19.10.2001: Besuch des German-Chinese Steering Committee of Marine Science and Geotechnologies
- Prof. Alexander **Yankov** (ITLOS, Germany and Bulgaria); 04.-06.09.2001: IOI-Executive Council Meeting
- Dr. Edy **Yuwono**, Tropical Ecology Centre, Jendral Soedirman University – UNSOED, Purwokerto, Indonesien; 12.-18.11.2000: German-Indonesian Cooperation in Marine Sciences and Geosciences – A bilateral meeting for project development
- Dr. Jochen **Zeil**, Australian National University, Canberra, Australien; 16.08.2001
- Claudio **Zettel**, IB-DLR, Köln; 22.05.2002: BMBF-Veranstaltung zur Wissenschaftlich-Technologischen Zusammenarbeit mit Brasilien
- Prof. Dr. Jing **Zhang**, State Key Laboratory of Estuarine & Coastal Research, East China Normal University, Shanghai; 15.-30.09.2000
