Media outreach

My work and publications have been featured in several dozen online and print newspaper articles in Germany and abroad. I have written several popular science articles for magazines, making my work accessible to the wider public. Furthermore, I have been interviewed several dozen times by radio and television stations, including major national German TV channels. The reports covered a range of topics, from my work on coral reef ecology and reef restoration to research on coastal resource use and management in Indonesia, the International Year of the Reef in 2008 and 2018, marine conservation in the Pacific, and coral bleaching and destruction in Southeast Asia and Australia.
